

Sector Skills Plan 2024/25

Official Sign-off

It is hereby certified that this Sector Skills Plan:

- was developed by the Management of the Services SETA in consultation with the Department of Higher Education and Training
- was informed by extensive primary and secondary research and complimented by comprehensive literature reviews.
- involved representative stakeholder consultation.
- accurately identifies hard-to-fill vacancies and skills gaps to inform strategic and annual performance priorities.

FOREWORD BY THE CHAIRPERSON OF THE ACCOUNTING AUTHORITY

The Sector Skills Plan 2024/25 update marks a critical milestone in the term of the current Accounting Authority – fifth and final year of office. This juncture calls for a critical self-reflection and introspection. A critical question to ponder includes what contribution has the Services SETA made in addressing the skills demands of the services sector; How has the mismatch between skills supply and demand been addressed; while ensuring alignment between skills supply and demand – thereby addressing unemployment and unemployability head-on, and what measures have been taken to mainstream transformational imperatives in the services sector?

Definite answers to these questions are obscured by external factors, some national and others global in nature. The outbreak of the COVID-19 pandemic set back many achievements recorded in the latter part of the NSDSIII which formed foundation upon which to build on the NSDP2030. The pandemic affected the post-school education and training sector in a direct and profound manner. Learning and teaching were interrupted for prolonged periods inhibiting the Services SETA to dutifully carry out its mandate.

Despite these challenges, the Services SETA recorded improvements from skills planning perspective. These events prompted the Services SETA to devise innovative ways of strengthening skills demand and supply surveillance, including the development of skills demand forecast model, leveraging on ICT. In addition, skills planning had to be closely aligned with the challenges of the day to ensure responsiveness to save businesses and jobs. Development of occupational qualifications, including learnerships and short skills programmes, closely aligned with change drivers for skills demand, were expedited.

Closer collaborations with key role players in skills development were cultivated. A large amount of energy was devoted to building capacity to supply within the TVET and CET colleges system. Mobilisation of employers, employer bodies, professional bodies, labour and learners was also intensified with vigour. Employer participation in skills development, at own cost, was also intensified through mobilisation and capacitation to participate in the WSP/ATR submission process and support with claiming Mandatory Grants. Trade Unions and Federations were also capacitated to initiate and participate in worker-driven skills development interventions.

Prioritisation of skills development interventions was foregrounded by transformational imperatives of ensuring equitable access to training opportunities by the SME sector, women, youth, people with disabilities and those living in rural areas. Vulnerable sectors and those requiring deliberate efforts to foster transformation have been identified, and appropriate interventions devised, implemented, and monitored. Care was also taken to ensure alignment with key government strategies to drive the reconstruction and recovery of the economy from the ruins of COVID-19 pandemic and the resultant economic meltdowns.

Having reflected on these achievements and daunting task ahead of us as a nation, the approach to this update has been premised to on the need to deepen demonstratable impact. As a result, prioritisation of change drivers of skills demand has been slightly modified to reflect current reality whilst not setting up new long-term objectives. Equally, prioritisation of skills development interventions has been closely aligned with the Services SETA's capacity to supply in respect of availability of appropriate occupational qualifications with accredited

service providers. Partnerships and collaboration with PSET role players have been given more impetus to realise demonstrable impact.

We will continue to strive to align Services SETA's learning intervention programmes with government strategies and plan. The Services SETA is actively to supporting the Presidential Youth Employment Initiative by placing University and TVET college graduates in employment to fight the scourge of youth unemployment – the WIL initiative. Priority is given to the Economic Recovery and Reconstruction Plan through implementation of relevant skills development as identified in the Economic Recovery and Reconstruction Skills Strategy of the DHET.

It is against this background, that I call upon all internal and external stakeholders to join hands once again in driving skills development revolution in the services sector to save business and jobs and entrench transformation for the benefit of our people.

31 July 2023

MR STEPHEN DE VRIES

EXECUTIVE SUMMARY

This SSP was prepared in accordance with Section 10 (1) (a) of the Skills Development Act (SDA) of 1998, which mandates the SETA to develop an SSP within the Framework and Guidelines included in the National Skills Development Plan (NSDP)2030. The key policy drivers identified and considered in this SSP are the National Development Plan (NDP), National Growth Path (NGP), Industrial Policy Action Plan (IPAP), Medium-Term Strategic Framework (MTSF) (2019-2024), National Skills Development Plan 2030 (NSDP), White Paper on Post-School Education and Training (WP-PSET), the Economic Reconstruction and Recovery Plan (ERRP), the Economic Reconstruction and Recovery Skills Strategy (ERRSS) and has been highlighted and the contribution of the Services SETA to the implementation of each, discussed.

This Sector Skills Plan (SSP) 2024/25 update is informed by findings from primary and secondary research methods that were used to collect information on skills demand and supply in the services sector. Primary research includes the analysis of the Services SETA mandatory grant data — Workplace Skills Plans (WSP) and Annual Training Reports (ATR); performance information (learner enrolments and completion data), employer surveys and stakeholder engagements. Secondary research includes a desktop literature review and analysis of employers' recruitment data; Statistics South Africa's (Stats SA) Quarterly Labour Force Survey (QLFS) and Growth Production Development (GDP). Research findings were validated through stakeholder workshops comprising the management and Accounting Authority of the Services SETA and key industry representatives.

The services sector, as demarcated by the Department of Higher Education and Training (DHET), refers to the 68 Standard Industrial Classification (SIC) Codes. The 68 industries have been divided into six chambers and 16 subsectors for operational purposes. As of February 2022, there were approximately 191 170 employers actively trading within the sector. Representing an increase of more than 3 000 new employers entering the services sector. Most employers are classified as medium to small, implying, companies employing no more than 150 people. Employers in the Services SETA sector are concentrated in Gauteng, KwaZulu-Natal, and the Western Cape provinces. Key role-players, and their influence on the services sector, include the Accounting Authority, employers, trade unions, TVETs, CETs, universities, industry bodies and associations.

Overall, the South African economy is not doing very well. The dire economic situation predates the COVID-19 pandemic era. The pandemic only served the exacerbated an already bad situation. Back on the heels of the COVID-19 pandemic, the globally spread inflation is inflicting yet another blow to the economy. The country is facing difficulties with regard to overall recovery. In 2022, economic trends were characterised by repeated growth and decline each quarter. Employment, for the same period, follow a similar pattern – a positive growth in one quarter and a negative growth in the next one.

To address the challenges faced by the services sector, the Services SETA aims to forge a close working relationship with the industry, labour and government, and all key role players in the Post-School Education and Training (PSET) ecosystem, to address the shortage of critical skills that can help grow the economy. Critical partnerships being pursued and/or planned are highlighted in Chapter 4. The central focus is building capacity to supply relevant skills to

support growth of the services sector and to bring business and labour onboard as key constituencies.

Change drivers for the skills development demand and supply include Information and Communication Technology, Economy, Climate Change and Globalisation. The technological evolution takes place at a rapid pace with dire consequences for the labour force, requiring regular upskilling of the economically active labour force and the supply of prospective labour force with relevant skills. Industries mostly affected by the technological change include marketing, real estate, postal services, contact centres and funeral services. Implications are that the labour force needs to be constantly acquiring the requisite skills, while the education and training institutions ensure the relevance of qualifications on offer. The Services SETA is collaborating with other SETAs to service the needs of the industry whilst developing in-house qualifications that address skills demand driven by technological change, especially management of big data.

Additional measures to mitigate the impact of key drivers of skills change introduced by the Services SETA include alignment with the government strategies and plans such as ERRP, ERRSS, Youth Employment Initiative. To address the latter, the Services SETA will continuously set aside annual targets to recruit and place University and TVET college graduates in workplaces, working with employers and labour.

A list of hard-to-fill vacancies is presented in Chapter 3, per chamber and subsector. An attempt has been made to ensure the ability of the Services SETA to service these qualifications by highlighting the available interventions and investigating the possibility of collaborating with other SETAs where possible. The services sector is one of the sectors that lags behind with regards to transformation. It is not surprising that equity consideration is one of the underlying reasons for hard-to-fill vacancies. Alignment with the Economic Reconstruction and Recovery Skills Strategy (ERRSS) has been effected by identifying scarce skills contained in the ERRSS that the Services SETA can support.

Common reasons for the inability to fill vacancies include lack of experience, qualifications, and equity considerations. Skills gaps for the services sector have also been identified. There is a strong focus on IT-related occupations which signifies the impact of the Fourth Industrial Revolution. These observations are in line with the ERRSS' list of skills gaps that have been highlighted in this SSP and alignment thereof strengthened.

Emanating from the lists of hard-to-fill vacancies or skills gaps, a draft list of priority occupations has been developed jointly with key stakeholders. The magnitude of demand has been determined with inputs from management and the industry. Identified interventions will inform the updates of the Strategic and Annual Performance Plans 2024/25 as well as the Service Level Agreement with the DHET.

Given the importance of partnerships in skills development, the Services SETA has initiated several partnerships with key stakeholders, which include Technical and Vocational Education and Training (TVET) colleges, universities, local government, and strategic national and provincial departments. The focus of these partnerships is on skills demand and supply, the roles of TVET Colleges, Higher Education Institutions, intermediaries, and inter-SETA collaboration.

The current inter-SETA collaboration is the best partnership model for the Services SETA. This approach brings SETAs together under one roof and allows for sharing of information and resources.

Chapter 5 has placed a greater emphasis on Monitoring and Evaluation practices at the Services SETA and how this data is used to inform planning. Monitoring and evaluation are crucial to the success of all SETA interventions and projects. The Services SETA's M&E approach is closely aligned with the Government-wide Monitoring and Evaluation framework and the government planning framework; a result-based management framework, embedded in the Theory of Change. This approach allows for effective use of performance information and audit outcomes in decision-making and will inform Services SETA's organisation-wide M&E framework that is being developed.

Chapter 6 outlines five priority actions for implementing the SSP 2024/25. These include:

- 1. Foster Inter-SETA collaboration and industry partnership to promote growth in the services sector including SMMEs.
- 2. Secure workplace training opportunities working in collaboration with the industry, employers, and SETAs.
- 3. Work with QCTO and industry role players to complete and implement registered occupationally directed qualifications.
- 4. Strengthen alignment between industry needs and Services SETA supply through research, implementation, and structured M&E.
- 5. Implementation of organisational-wide M&E Framework to improve performance management.

A conscious decision has been made to retain priority actions from the SSP 2023/24 to allow for implementation, monitoring and evaluation as some of these action plans are short- to medium-term life cycle.

MR MENZI FAKUDE	MR STEPHEN DE VRIES
CHIEF EXECUTIVE OFFICER	CHAIRPERSON: ACCOUNTING AUTHORITY

RESEARCH PROCESS AND METHODS

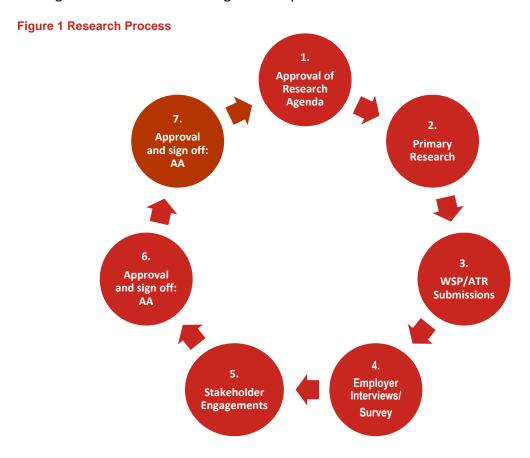

Introduction

The Sector Skills Plan (SSP) is one of the key strategic documents that the Services SETA needs to develop. It is the culmination of rigorous research on the key skills development trends and issues in the Services Sector. In addition, the Services SETA conducts various research projects and studies in line with the Research Agenda approved by the Accounting Authority. These research studies then contribute relevant information and knowledge to the six chapters in the SSP document.

The Department of Higher Education and Training (DHET) prescribed an SSP framework emphasising that the SSP must be informed by accurate, evidence-based research responding to the skills needs and gaps using objective study and consultations with the sector stakeholders. The Services SETA's Sector Skills Plan 2024/25 updates were informed by primary and secondary data, including qualitative and quantitative research methods. This Sector Skills Plan (SSP) section outlines the research methods and processes applied in producing this SSP document.

Research Process

Figure 1 below depicts the Services SETA research process followed in producing the sector skills plan and the primary data collection methods used to collect data analysed in the SSP. This process starts with the Approval of the Research Agenda and ends with the final approval and sign-off from the Accounting Authority.

Approval of Research Agenda by the Board

The research agenda is prepared every preceding year to guide research activities that inform the SSP update. This research is then implemented following the purpose outlined above. The research agenda for 2024/25 was approved in June 2023 and is attached herein as an annexure. Approval of the research agenda happens at the Accounting Authority level with the guidance of the Management and Risk, Governance and Strategy Committee (GRSC). This approval allows the research team to actively implement the various research topics in the Research Agenda.

ii. Primary Research

The inception of new projects starts from 01 April (in line with the new financial year) until the completion. The start of new projects coincides with the financial year to ensure alignment with the budget. The completion date is dependent on the scope of the project, however, care is often taken to ensure that research projects do not exceed two consecutive financial years. In this update findings from the following primary research studies were used:

- 1. Services Sector Economic and Skills Demand and Supply Analysis (WSP/ATR analysis)
- 2. Labour Market Outcome of the 2020/21- 2021/22 Cohort (Learner Tracer)
- 3. A skills demand and supply analysis and forecast model for the Services SETA
- 4. Evaluation of the implementation of NSDS III and NSDP2030
- 5. Customer satisfaction survey

A summary of the research methods, research design, sample size and research tools used has been outlined below.

a) Research Study Title: Learner Tracer Study

<u></u>	
Objective of the study	To track and trace learners who completed Services SETA learning interventions from 2011/12 to 2021/22
Research design	Quantitative
Research method	Online survey
Sample size	3 365 email invitations sent out to a list of contacts and 939 responses received. Additionally, 2 281 responses were received through a link that was posted on the Services SETA webpage and sent via cell phone numbers. 3220 is the total number of responses
Data sources	Completed surveys
Study duration	February 2022 was completed by 28 February 2023

b) Research Study Title: DHET Employer Interviews

<u>′</u>	
The objective of	The purpose of this project was to conduct interviews with employers pertaining
the study	change drivers, hard-to-fill-vacancies, skills gaps
Research design	Qualitative
Research method	In-depth Interviews
Sample size	14
Data sources	Completed questionnaires
Study duration	1 July 2022 was completed by 30 November 2022

c) Research Study Title: Customer Satisfaction Survey

Objective of the study	The overall objective was to conduct a customer satisfaction survey on the Services SETA services in the provision of its guaranteed programmes and generate insights on how to further improve the quality of services. The study aimed to determine whether stakeholders are satisfied with the services and products provided by the SETA. Determine whether stakeholder expectations are being met, and whether stakeholders plan to participate in future activities. Assist the organisation to assess the extent in which its reputational goals are being met.
Research design	Quantitative and qualitative
Research method	Computer-assisted telephonic interviews (CATI) online interviews
Sample size	85 CATI with employer, 300 CATI & online with learners, 85 CATI with skills development providers as well as 8 IDIs (3 board members and 5 executive managers)
Data sources	Completed surveys and interview guides
Study duration	Commenced December 2022 and was completed by 31 March 2023

d) Research Study Title: A skills demand and supply analysis and forecast model for the Services SETA

Objective of the study	To develop a forecast model for skills demand and supply for the services sector for the next five years
Research design	Quantitative
Research method	Analysis of existing data
Sample size	Not applicable
Data sources	Stats SA's QLFS, GDP; Services SETA WSP/ATR, Performance Information
Study duration	Commenced January 2022 was completed on 31 July 2022

e) Research Study Title: Evaluation of the implementation of NSDS III and NSDP

Objective of the study	To evaluate the Services SETA's success in implementing the NSDSIII and two years of NSDP2030
Research design	Quantitative and Qualitative
Research method	Strategy documents review, policy review, interviews with managers and executive managers, employer survey, case studies of Services SETA interventions and learner tracer study
Sample size	 Employer Survey: A total of 1 667 invitations were sent to the employers, only 229 responded. There were 32 partial and 197 complete responses. Interviews with Services SETA managers and executive managers: TBC Case studies: 8 cases of interventions implemented by the Services SETA was identified and their impact analysed
Data sources	Stats SA's QLFS, GDP; Services SETA WSP/ATR, Performance Information
Study duration	Commenced February 2022 was completed on 31 March 2023

iii. WSP/ATR Submissions

WSP/ATR data is critical in informing the SSP, especially regarding the nature and extent of skills demand for the sector, including the economic outlook. Around 4 567 employers

submitted WSP/ATRs in year 2023/24, which were analysed to inform this update. As discussed above, WSP/ATR data is crucial for understanding skills demand and supply in the services sector. The analysis focused on the Lists of Hard-to-Fill Vacancies, Skills Gaps, Change Drivers and Future skills. Consideration of planned and implemented skills was also made in the overall analysis.

iv. Consultations

The lists of Hard-to-Fill Vacancies, Skills Gaps, Change Drivers and Future skills compiled from the sources and process outlined above were discussed with the management team for final consideration, taking into account the training budget available, availability of qualifications and training providers, and national priorities, especially the Economic Reconstruction and Recovery Skills Strategy. Table 1 outlines the extent of engagements with various stakeholder engagement workshops and internal consultations.

There were online workshops with stakeholders to investigate the nature and extent of skills demand and supply and change drivers within the services sector. Follow-up validation workshops were later held with previous participants to confirm the validity of the skills identified and the magnitude. These are depicted below:

Table 1: List of Stakeholder Engagement Sessions

Stakeholders	Date
Management Strategy Session	05 May 2023
Governance Risk and Compliance Committee	10 May 2023
Management and Business Services Chamber validation workshop	11 May 2023
Haircare, Beauty and Image Services Subsector validation workshop	15 May 2023
Communications and Marketing Services Chamber validation workshop	15 May 2023
Labour and Collective Services Chamber validation workshop	16 May 2023
Real Estate and Related Services Chamber validation workshop	17 May 2023
Funeral Services Subsector validation workshops	18 May 2023
Executive Committee of the Accounting Authority	18 May 2023
Cleaning and Domestic Services Subsector validation workshop	19 May 2023
Hiring Services Subsector validation	30 May 2023
Executive Committee of the Accounting Authority	14 June 2023
DHET Feedback Session	10 July 2023
Governance Risk and Compliance Committee	18 July 2023
Executive Committee of the Accounting Authority	20 July 2023
Accounting Authority	28 July 2023

Conclusion

The methods of data collection discussed above provide a balance between quantitative and qualitative methodologies. There are many benefits and some limitations to each of the methods used. However, applying the above provides rich data that was analysed for accurate information in the SSP update.

CHAPTER ONE: SECTOR PROFILE

1.1. Introduction

This chapter presents the profile of the services sector by covering its: scope of coverage, key role players, economic performance, employer profile, and labour market profile and its evolution. This chapter discusses the size and shape of the services sector, thereby providing an understanding of the contribution of the sector to the overall economic, employment and human capital development. The discussions herein, are informed by data collected through primary and secondary research. Primary data include a research study on the impact of COVID-19 on the services sector, a learner tracer study, a study on the skills demand and supply in the services sector, impact evaluation of the NSDSIII and baseline for the NSDP2030, SETAs' Workplace Skills Plan (WSP) and Annual Training Report (ATR) 2023 data, series of workshops with services sector stakeholder analysis of the Services, Services SETA Performance Information, Gross Domestic Product (GDP), Quarterly Labour Force Surveys (QLFS), and Quarterly Employment Surveys (QES) by Statistics South Africa (Stats SA). Secondary data include a review of published and unpublished, international, and national research studies.

1.2. Scope of Coverage

The Services SETA is constituted by 68 SIC (Standard Industrial Classification) codes which have been clustered into sixteen subsectors which have been grouped into six Chambers. This section commences with a description of the services sector as defined by the Standard Industrial Classification codes (SIC Codes). The discussions on the scope of the services sector will reveal firstly, that the sector is very diverse and cuts across several major industry categories. Secondly, the services sector is informal and comprises of many small and medium-sized companies. Given the diversity of the sector, several role-players provide support in ensuring that the sector supports the sustainability and growth of Small, Micro and Medium Enterprises (SMMEs), including its labour force. Table 2 provides a breakdown of the Services SETA's industries by 68 SIC codes, 16 sub-sectors and six chambers. Each of these sub-sectors has characteristics, employment trends and economic drivers that are strikingly different from one another. The different sub-sectors have, in turn, been grouped into six chambers.

Table 2: Services SETA Chambers and Sub-sectors

Cleaning and Hiring Services Chamber

1.3. Key Role-Players

The key role-players in the services sector include the accounting authority, industry organised bodies and associations, employers, trade unions and educational and training institutions. A brief description of each key role player, their role at the Services SETA and their contribution to the NSDP outcomes is provided in Table 3 below.

Table 3: Key Role Players

Key Partners	Description
Services SETA Accounting Authority	The Accounting Authority of the Services SETA and its five committees plays a key role in governing and managing the SETA in accordance with the PFMA, as well as any other applicable legislation. These committees are mechanisms to assist the Accounting Authority in giving detailed attention to specific key areas of its duties and responsibilities, including the implementation of the NSDP 2030. Role in relation to NSDP Outcomes: Provides oversight role over the Services SETA to ensure that the SETA fulfils its mandate and effectively implements all 8 outcomes of the NSDP.
Employers	Employers are a critical voice for the business community in influencing policy direction of the country. The Services SETA interacts with employers through associations among whom chamber committees are constituted to jointly facilitated the skills development in line with the NSDP 2030. Annexure B lists bodies that constitute key role players in the sector. Role in relation to NSDP Outcomes: Supports outcomes 1; 2; 3 & 4.
Trade Unions	Trade Unions are critical voices of the workers. They lobby workers to participate in skills development initiatives to improve their skills. And advises SETAs on skills demand and supply. Role in relation to NSDP Outcomes: Supports Outcome 7.
Department of Higher Education and Training	The Department of Higher Education and Training makes provision for skills development legislation, policies, regulations, and guidelines. Key policies include the NSDP 2030 and the White Paper on Post-School Education and Training. The Services SETA is committed to the implementation of the NSDP outcomes through the Sector Skills Plan (SSP), the Strategic Plan and the Annual Performance Plan (APP).

Industry Bodies and Associations	Organised Employer organisation provides a collective voice of the industry. They also play an important role in formalising and standardising operations within the sector. Role in relation to NSDP Outcomes: They provide a support role in all NSDP outcomes by ensuring that skills development initiatives are implemented and monitored.
TVET Colleges, CETs and Universities	TVET Colleges, CETs and Universities are a critical component of the skills development ecosystem within the PSET system. They are responsible for implementing the training interventions. They are a critical link between education and the world of work. The Services SETA works closely with the TVET Governance Council and DHET to develop their capacity. Role in relation to NSDP Outcomes: Supports: Outcomes 2; 3; 4 & 5.
Skills Development Providers	They provide skills development training in the labour force, and they are on the supply side. Role in relation to NSDP Outcomes: They support outcome 2; 3 & 4.

1.4. Economic Performance

The section on the economic performance of the services sector provides an account of the sector's contribution to the economy in comparison to the rest of the economic sectors, a description of how the sector is currently performing and its outlook. The chapter then focuses on the employer profile and the labour market profile. Both are significant in providing a detailed understanding of the nature of employers and employment in the sector. It is important to emphasise that the Services SETA's scope of coverage overlaps with several industries as defined by the WTO and Stats SA. Analysis of the services sectors that fall under the Services SETA purview includes Finance, Transport, Construction, Mining, Agriculture and Personal Services. Reference to the services sector in this Sector Skills Plan includes the above-mentioned subsectors. Figure 2 reflects the GDP growth trends and industry contributions.

Source (Stats SA, 2023a)

As Figure 2 illustrates, the South African economy has not fully recovered from the effects of the COVID-19 pandemic. Despite the promising signs of recovery with the easing of lockdown regulations, economic growth as measured in GDP terms has not fully recovered. The South African economy grew by 0.4% in Quarter 1 of 2023, following a decline of -1.1% in Quarter 4, 2022. Recent global events such as high inflation rates and widespread increases in interest rates are the clearest indicator that the economy is in for a long ride, from the recovery perspective. Increases in commodities such as gas, oil and certain food items are likely to exacerbate an already worse situation. The effects of the war between Russia and Ukraine are yet to filter through given their role in the world commodities in the form of gas, oil, and grain.

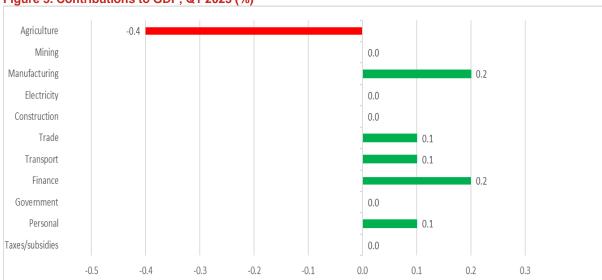

Figure 3. Contributions to GDP, Q1 2023 (%)

Source (Stats SA, 2023a)

Regarding the industry's performance, the manufacturing and finance sectors performed better, followed by trade, transport and personal. The largest decline was in agriculture sector.

The 2022 Quantec data of services sector contribution to the GDP by chambers shows a growth, from R1,129,555 million in 2021 to R1,303,306 million in 2022, see table 4 below. It is important to monitor growth trends at the chamber level to identify areas that require urgent attention in good time.

Table 4: Services Sector GDP at current prices by Chamber1(R'm)

Chamber	2019	2020	2021	2022
Cleaning & Hiring Services Chamber	56,553.1	48,288.5	49,672.4	49,871.1
Communications and Marketing Services Chamber	105,378.5	98,746.4	94,204.3	94,581.1
Labour & Collective Services Chamber	495,510.8	527,461.5	577,910.2	580,221.8
Management & Business Services Chamber	217,192.2	218,437.9	234,961.8	235,901.6
Personal Care Services Chamber	86,585.2	73,911.0	93,557.0	93,931.2
Real Estate & Related Services Chamber	87,620.9	85,981.1	79,249.7	79,566.7
Total	1,048,840.7	1,052,826.5	1,129,555.5	1,303,306.7

Source (Quantec, 2023)

1.5. Employer Profile

1.5.1. Size of Services SETA

The services sector is one of the leading sectors in South Africa in terms of GDP growth and employment. There are about 191,170 employers belonging under the Services SETA services sector. The majority of employers are found in Management and Business Services Chamber, followed by Real Estate and Related Services Chamber.

Table 5: Services SETA Chamber by Size and Levy Status

Row Labels	Grand Total	Levy P	aying Total	Non- Levy Paying Total		
Now Labels	Grana rotar	Total	%	Total	%	
Cleaning and Hiring Service Chamber	5,024	983	3%	4,041	3%	
Communications and Marketing Services	4,395	697	2%	3,698	2%	
Labour and Collective Services Chamber	4,323	726	2%	3,597	2%	
Management and Business Services Chamber	153,452	27,039	75%	126,413	81%	
Personal Care Services Chamber	8,795	3,106	9%	5,689	4%	
Real Estate and Related Services Chamber	15,181	3,380	9%	11,801	8%	
Grand Total	191,170	35,931 (19% of total employees)		155,239 (81% of total employees)		

As the table above illustrates, it is only 19% of the Services SETA employees that are paying levies as per Skills Development Levies Act. The majority of Services SETA's employers are concentrated in the Management and Business Services Chamber. The irony of this chamber is that it has the highest number of levies paying employers (75%) as we as non-levy paying employers (81%). It has a mixed of both formal and employer businesses.

¹ This data is extracted from Quantec (Jun 2021a) which is calculated from the Stats SA annualized GDP. Stats SA's withholding of GDP data at 4-digit level has made estimates less accurate. This information should therefore be understood in this context – it is closest economic data available.

Table 6: Services SETA Employers by Chamber, Subsector, Size and Levy Status

	Levy Paying					Non-Levy Paying				
Row Labels	Large	Medium	Small	Unknown	Total	Large	Medium	Small	Unknown	Total
Cleaning and Hiring Service Chamber	5	15	419	544	983	56	132	2,559	1,294	4,041
Cleaning Services	4	9	149	155	317	40	75	1,136	644	1,895
Domestic Services	0	0	8	0	8	0	0	18	13	31

Fashion Services	0	1	2	1	4	0	0	5	2	7
Funeral Services	0	0	5	3	8	0	0	33	11	44
Hair care Services	1	1	679	2,227	2,908	8	20	4,176	778	4,982
Real Estate and Related Services Chamber	2	6	1,287	2,085	3,380	21	42	8,543	3,195	11,801
Real Estate Services	2	6	1,287	2,085	3,380	21	42	8,543	3,195	11,801
Grand Total	113	365	19,378	16,075	35,931	647	1,550	129,490	23,552	155,239

As figure 4 illustrates, majority of Services SETA employers are based in Gauteng Province with 117 362 employers stating that they are based in this province, followed by Western Cape and KwaZulu-Natal with 29 734 and 17 086, respectively.

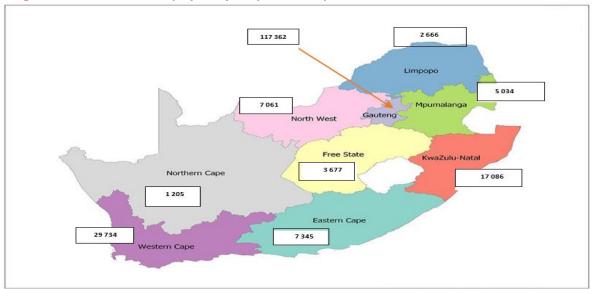

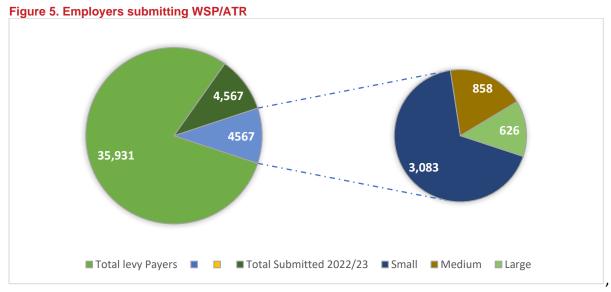

Figure 4. Services SETA Employers by the provincial spread

Source: Services SETA Database, 2022

1.5.2. WSP/ATR Submission

There are about 35 931 employers paying skills development levy to the Services SETA. Only about 4 567 submit WSP/ATRs. Majority of these were small employers. The Services SETA has embarked on a wide campaign to encourage employers to submit WSP/ATR and provide support where necessary. Participation of employers in the submission of WSP/ATR is a direct indicator of employers' participation in workplace training. Information collected about training interventions planned and implemented helps the Services SETA to properly plan for skills development in the sector.

Source: Services SETA Database, 2022

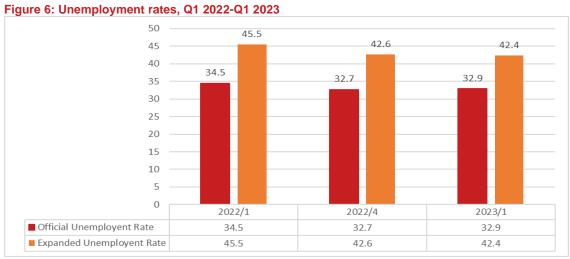

This section is meant to provide a description of the firms that comprise the services sector is provided as well as their distribution in terms of company size and location of trading. The source of data is the DHET/SARS Database and WSP/ATR submissions.

1.6. Labour Market Profile

The labour market profile describes how many people are employed in the sector, their race, gender, age, and disability characteristics. Of importance is the analysis of employment in the sector according to occupational levels. This occupational analysis provides insights into the degree to which the sector has contributed to the national agenda of transformation of the labour force. Data used is derived from Stats SA's QLFS and QES, and Services SETA's WSP and ATR 2023.

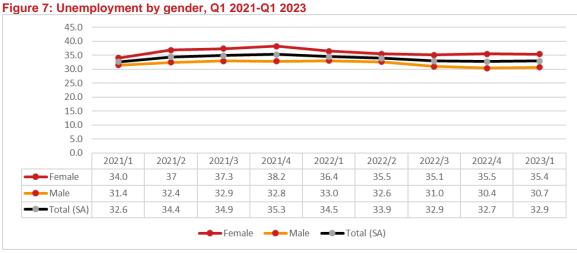

1.6.1. Employment by Sector

In line with the falling economic growth, unemployment levels have persistently increased in the last two years. As illustrated, the expanded unemployment rate is higher than the official unemployment rate. The official unemployment rate increased by 0.2% to 32.9% in the first quarter of 2023 compared to quarter four of 2022. The expanded unemployment rate decreased by 0.2% in the first quarter of 2023 compared to quarter four of 2022. This trend contributes significantly to poverty and inequality in the country.

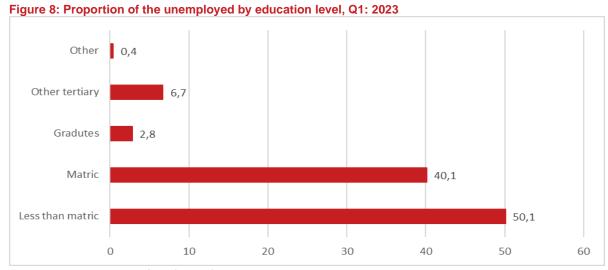

Source: Statistics South Africa (2023b)

Hardest-hit are precarious jobs, predominantly found in the informal sector. However, along with the GDP figures for Q4 2022, the expanded unemployment rate fell by 0.2%% and increased by the same rate for the official unemployment rate. More work is needed to grow the economy. Skills development interventions play a central role in this regard by ensuring an adequate supply of skilled workforce. The Services SETA is monitoring these developments carefully to ensure an appropriate response, from a skills development perspective.

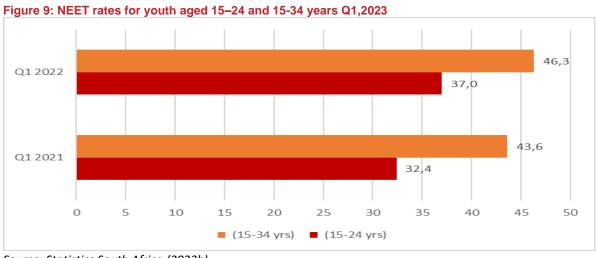

Source: Statistics South Africa (2023b)

Regarding unemployment by gender, women still bear the harshest brunt of unemployment. In Q1 2023 alone, unemployment among women was more than 5% of men – see Figure 7. In addition to women, youth and people with low levels of education are disproportionately affected by unemployment. Unemployed work seekers with no matric accounted for more than half of the total unemployed, followed by those with matric. Unemployment was lowest among graduates at 2,8%.

Source: Statistics South Africa (2023b)

Unemployment among youth, especially those who are not in employment or education and training (NEET) is equally concerning. The Stats SA distinguishes between the NEETs aged 15-24 and 15-34. The stats indicate that the latter category of NEET is particularly affected by unemployment. Close to half of this labour force was unemployed. And as the case with the general unemployment trends, the numbers keep rising at a worrying rate. As of Q1 2023, total employment in South Africa increases by 1.3 million people. The majority of those employed were in the finance sector as illustrated below.

Source: Statistics South Africa (2023b)

Notwithstanding, the informal sector along with private households contributes a sizable portion of the employed workforce. This is the industry that is conspicuously dominant in the services sector. Notwithstanding the difficult economic conditions that the sector faces, the services sector remains the largest backbone of employment in South Africa. Key industries that have higher concertation of services sectors such as private households, community and social services, and finance account for a substantial number of the employed labour force.

Figure 10: Employment by industry, in thousands, Q4 2022 - Q1 2023

Source: Statistics South Africa (2023b)

Employee demographic profiles as well occupational trends within the services sector are provided below. Analysis of the Stats SA's QLFS Q1 2021 at a 4-digit level, reveals that most people were employed under Labour & Collective Services Chamber, with 1 070 395 people employed in this subsector followed by with Management and Business Service Chamber 488 343 employees (Quantec, 2021b). When the Stats SA QLFS of 2021 (Stats SA, 2021a) is compared with the Services SETA Chambers, it reveals correlations between the economic size of the subsector and employment levels.

The general trend is that employment in the services sector declined consistently in the last two years. This places greater responsibility on the Services SETA to design appropriate interventions to supply the sector with suitably qualified labour force to drive the growth of this sector.

Table 7. Employment in the Services Sector by subsector²(R'm)

Industry	2015	2016	2017	2018	2019	2020	2021
Cleaning and Hiring Services Chamber	129,010.1	127,667.1	133,703.6	139,625.0	143,197.2	116,647.0	111,583.8
Communication and Marketing Services Chamber	214,563.6	209,206.2	214,291.5	239,355.9	233,333.7	209,527.5	190,228.2
Labour and Collective Services Chamber	875,872.1	932,119.6	999,565.2	1,049,744.1	1,061,588.2	1,045,185.8	1,070,395.2
Management and Business Services Chamber	456,607.0	451,567.1	486,432.5	506,200.3	525,904.3	491,495.1	488,343.6
Personal Care Services Chamber	195,681.9	208,639.7	219,053.9	220,168.8	233,186.3	186,057.4	204,439.4
Real Estate Services Chamber	302,625.9	338,580.1	344,411.0	346,979.2	329,663.5	282,612.7	264,994.5
Total	2,174,360.7	2,267,779.8	2,397,457.8	2,502,073.2	2,526,873.2	2,331,525.4	2,329,984.6

Source: Quantec (June, 2023b)

² This data is extracted from Quantec (June 2021) which is calculated from the Stats SA annualized QLFS. Stats SA's withholding of QLFS data at 4-digit level has made estimates less accurate. This information should therefore be understood in this context – it is closest economic data available. The unavailability of recent data rendered it impossible to provide 2021 figures.

The section below provides a demographic profile of the services sector labour force. The information is gleaned from the QLFS and WSP/ATR. The latter is based on the submission of more than 4 567 employers who participate in workplace training. It provides a useful benchmarking against the overall sector as per Stats SA data.

1.6.2. Employees' Demographic Profiles

a) Gender

International trends on the demographic features of the services sector employees point to bias towards men (Haroon, et al., 2016). This is because industries such as manufacturing, transport, storage, government services, communication and business are traditionally dominated by men (Ibid). The Quarterly Labour Force Survey (Stats SA, 2020a) indicates that 56% of the labour force in the services sector is comprised of men, Table 8. whilst the Services SETA WSP/ATR (2022) which indicates that 47% of the labour was male and also indicates that the Services SETA is employing more woman (53%) than male.

b) Race

Regarding the racial composition of the services sector workforce, almost 76% comprises Africans. Followed by Whites and Coloured at 12% and 9%, respectively. These trends are in line with the demographic features of the South African population. The only downside, though, is that most of the population is concentrated in low-skill and low-pay jobs.

Table 8. Employment by Gender, Race and Age in the services sector

Gender	Services SETA (2022)	National (Stats SA) (2023)
Male	393 270 (47%)	1 453 534.2 (62%)
Female	451 895(53%)	875 715.8 (38%)
Total	845 165 (100%)	2 329 250.0 (100%)
Race		
Black African	543 125(64%)	1 777 556.9 (76%)
Coloured	79 519(9.4%)	200 115.1 (9%)
Indian/ Asian	43 372(5.1%)	66 854.1 (3%)
White	175 465 (21%)	284 724.0 (12%)
Other	484 (0.1%)	
Total	845 165 (100%)	2,329,250.0 (100%)
Age		
<34yr	395 197 (47%)	826 512.28 (35%)
35-54yr	405 267 (48%)	1 320 989.99 (57%)
>55yr	30 143 (3%)	181 697.76 (8%)
Unknown	14 558 (2%)	
Total	845 165 (100%)	2 329 250.04(100%)

Source: Services SETA Mandatory Grant Data, May 2022, Statistics South Africa, 2023b

c) Age

According to Stats SA data, most employees in the services sector (57%) are aged between 35-54 years. These trends are in line with the WSP/ATR data which indicates 48% of the total labour force is between ages of 35 and 54 years. This implies that this sector tends to attract a matured workforce.

d) Disability

According to the WSP/ATR (2022), about 3% of employees had some form of disability. The most common form of disabilities mentioned were sight and physical disabilities. The rest of the disabilities indicated were others or multiple.

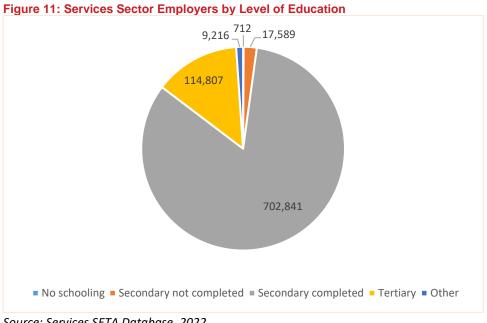

1.6.3. Services Sector Occupational Trends

a) Occupational Category

Data from Stats SA indicates that in 2022 most of the workforce in this sector was employed at the level of domestic workers (51%), followed by salespersons (24%). These developments suggest that the Services SETA should ensure that there are sufficient qualifications at the higher NQF level to ensure the relevance of training interventions. As will be discussed in Chapter 4, several initiatives are underway to establish partnerships with universities to help strengthen the pipeline of skills supply.

b) Levels of education

Regarding the level of education, the WSP/ATR data indicate that some of the workforce has not completed secondary education (3%), with most having completed secondary education (83%). Only 13% of the workforce had tertiary education.

Source: Services SETA Database, 2022

Of particular interest in the analysis of the educational qualification of services sector labour force, is that the number of completions with no schooling is decreasing, whilst those who have completed secondary education are steadily increasing.

c) Working conditions

Analysis of WSP submissions reveals that many workers are employed permanently. About 67% of the workforce was employed permanently. The reminder is being temporarily employed. Temporary staff include TES assignees, interns and leadership students.

1.7. Conclusion

Chapter 1 demonstrates that overall, South Africa's economy is slowly recovering to the pre-COVID-19 pandemic era. By Q1 2023, the GDP grew by 1,1%. Similarly, unemployment rate dropped to 32,9%. Employer participation in WSP/ATR at the Services SETA also increased, as well as levy contribution. These are promising signs that the economy is making a positive return. These developments allow the Services SETA to plan meaningful to support the growth.

CHAPTER TWO: KEY SKILLS CHANGE DRIVERS

2.1. Introduction

This chapter presents the key skills change drivers that have been identified as those that influence the demand for and supply of skills, either positively or negatively, in the services sector. The implications for skills development in the sector will be outlined. Key skills change drivers were identified through primary and secondary data.

The source of data included desktop review of existing literature on megatrends in the services sector and a review of Services SETA's performance in the past financial year. This review and analysis indicate that all the megatrends identified herein, bar, COVID-19 pandemic are still driving skills demand in the services sector. For this reason, this SSP update will retain the change drivers, and leave out the COVID-19 pandemic.

2.2. Factors affecting skill demand and supply

2.2.1. Information and Communication Technology

The impact of ICT on the services sector transcends all industries in varying ways. At the core of this impact is the need to do business differently, leveraging on opportunities presented by the technology. For employers, this means the possibility of a reduction in the cost of doing business and creating value for customers. For the workforce, this implies changes in occupations, jobs, and tasks. Some jobs may become obsolete and can be replaced with new ones. This will require upskilling and reskilling of the current workforce to avoid possible job losses. The digital communication platforms, the growth of e-commerce, global industry and customer access are some of the main trends that are driving the services sector.

Table 9. Skills Implications of ICT on the Services Sector

Subsector Impact	Nature of impact	Occupations affected
Business Services	Ability to access and use big data	Quality Manager; Business Advisor / Consultant
Contact Centre Services	Automation of certain functions	Contact Centre Call Agent/Manager
Recruitment Services	Online recruitment	Recruitment officer
Postal Services	Digitised mail	Delivery driver; mail clerk
Real Estate Services	Online marketing and contracting. Automation and other types of digital technology are continuously enhancing services and providing improved cost efficiency.	Sale Agent; Property Agent

Technology has had an impact on the design, form, and nature of the interaction between sellers and buyers. This impact traverse sub-sectors such as real estate services, business services, contact centre services, recruitment services, and postal services. Subsectors

impacted and implications for skills development are outlined in Table 9. In the main, companies are required to invest in ICT training for staff to avoid layoffs and improve operational and cost efficiencies.

2.2.2. Climate Change

Climate change may lead to job and work productivity losses because it increases the frequency of extreme weather events and, more generally, threatens the provision of ecosystem services. At the same time, it presents opportunities for new occupations in the services sector. Several electricity disruptions have affected the sector profoundly as it makes the cost of running a business to be slightly high as the sector seeks alternative power supply. The services sector has also been affected by the increase in fuel prices. As the International Labour Organisation (2018) notes, climate change and other forms of environmental degradation have already caused net negative impacts on jobs and work productivity. It is expected that these impacts are likely to become more pronounced in the coming decades (*Ibid*).

Table 10. Skills Implications of Climate Change on the Services Sector

Subsector Impact	Nature of impact	Occupations affected
Cleaning Services	Environmentally friendly products	Commercial cleaner
Personal Care Services	Environmentally friendly products, alternative ways to consume electricity	Hairdresser; Beautician; Barber
Funeral Services	New burial practices	Mortician; Funeral Director; Embalmer; Coffin Maker
Real Estate Services	Travelling to clients has been impacted due to the increase in fuel prices	Property developer; Real Estate Agent/Manager; Leasing Agent

Pressures around protecting the environment, the preservation of natural resources, and energy conservation affect the personal care and real estate sectors mostly. Green funerals are becoming the choice for most consumers (Lukstins, 2015). Local cemetery green burial policies are introducing local burial restrictions to citizens. The hair industry is under increasing pressure to use chemicals that are not harmful to the environment and users.

2.2.3. Economy

As pointed out in chapter 1, the South African economy experienced a serious contraction last year. The COVID-19 pandemic exacerbated an already worse situation. The services sector, the backbone of South Africa's economy, was disproportionately affected by the pandemic. This sector has not fully recovered from these setbacks as demonstrated by the GDP figures for Q1 2022. The decline in economic growth has had a knock-on effect on the employment situation as many companies closed or were forced to lay off staff to reduce expenditure. The current situation will require innovation to keep businesses afloat and grow the economy. Table 11 illustrates the impact of the economy on the services sector.

Table 11. Skills Implications of Economy on Services Sector

Subsector Impact	Nature of impact	Occupations affected
Business Services	The need to upskill business advisors and	Contact Centre Manager, Quality
	consultants, including e-commerce	Manager; Business Consultant/Advisor
Marketing Services	Changing landscape of the marketing industry	Sales Manager; Sales Representative
Recruitment Services	Changing landscape of the labour	Recruitment manager, Recruitment
	recruitment industry	officer
Real Estate Services	Changing landscape of the real estate	Sale Agent; Property Agent; Property
	industry, including high reliance on ICT	developer; Real Estate Agent
Beauty Treatments	Business downsizes due to changes in	Health and Skin Care Therapist, Spa
Services	the economy	Therapist, Nail Technician
Funeral Services	Some funeral undertakers find	Mortician, Funeral Director, Embalmer,
	themselves having to do pro-bono work	Mortuary Technician / Assistant,
	for families who are unable to pay for	Crematorium Operator
	the burials of their loved ones	
Hair care Services	Business downsizes due to changes in	Hairdresser
	the economy	

The Economic Reconstruction and Recovery Plan discussed below provides a helpful strategy to drive growth in this sector. The Reconstruction and Recovery Skills Strategy provides further clarity for alignment with skills planning initiatives of the Services SETA. Due job losses during covid-19; there is a need to develop other business streams not depended on face-to face events, making room for innovative ideas to take form. This will require retraining and/or upskilling of staff. With the country facing an intense energy crisis, the services sector has been impacted hard as alternative sources of acquiring energy had to be utilised to mitigate against business interruptions. Solar installing skill sudden becomes a critical skill to be learnt.

2.2.4. Globalisation

As higher levels of integration due to globalisation continue, business in most sectors is experiencing higher levels of competition. In addition, emerging and developing economies are seen as new engines of growth as companies continue to look for new locations for business investment. Recent real GDP growth projections support this notion. It is further expected that the global Services Sector will continue to drive global trade (World Bank Group, 2016) where contact centres play a significant role in supporting business operations through global process outsourcing.

Table 12. Skills Implications of Globalisation on the Services Sector

Subsector Impact	Nature of impact	Occupations affected
Business Services	Business Process Outsourcing (BPO)	Contact Centre Manager, Workforce
	increases the demand for skills within	Planning, Enterprise Resources Planning
	the global business environment	etc
Personal Care Services	The sector is highly informal and entry	Hair dressing; Beautician; Barber
	into the business is not controlled	
Funeral Services	Having to adhere to other countries'	Mortician; Funeral Director; Embalmer;
	laws on handling and dressing bodies.	Coffin Maker

The Hair Care industry tends to be highly informal and entry into the business is not controlled. Employers in this subsector stated that products were being distributed in the African market that has been banned in Europe and North America. Trends observed in formal hair care companies are that there was a decrease in the number of young new entrants, and an increase in the availability of consumer products and hair care practitioners from across the African diaspora operating in South Africa. Regarding implications for skills planning, there is a growing demand for qualified hairstylists in the Afro hair industry.

2.3. Policy Frameworks Affecting Skills Demand or Supply in the Sector

This section looks at the major national plans and strategies that affect the services sector, with emphasis on the implications for skills planning. The Services SETA values the significance of strong alignment between its programmes and the national strategies. Table 13 provides a brief discussion of each national strategy and policy.

Table 13 National strategies/policies and implications for skills development

National Strategy/Policy	Implications for skills development
National Skills Development Plan 2030	The main task of the Services SETA is the implementation of the NSDP. The NSDP is a 10-year plan for skills development in post-school education and training in South Africa. This will be realised through 8 Outcomes. Through the SSP and later the Strategic and Annual Performance Plans, the Services SETA will factor these outcomes in its operations.
National Development Plan 2030	The NDP 2030 forms the basis of all national policies and strategies. The South African government plans to stimulate economic development and growth through SIPs. The Services SETA has an integral role to play in terms of using the SIPs as a training platform. As the SIPs are being implemented, they will invariably interface with Project Management Services, Hiring Services, Recruitment Services, Cleaning Services, Household Services, Collective Services such as dispute resolution and wage negotiation services, Business Services and Real Estate Services.
New Growth Path	Services SETA's response to NGP is to identify large infrastructure projects that provide opportunities for sector role-players, employment creation, small business expansion and rural development. In addition, Services SETA will contribute to areas of the economy like the green industry and environmentally friendly production processes by exploring the role that can be played by the services sector. The Services SETA is reviewing current learnerships and qualifications to determine the extent to which they respond to the current skills needs. Work is already underway to fill the identified skills gaps.
Medium-Term Strategic Framework (2019-2024)	The Services SETA, through its Special Projects Department, has targeted small-and micro enterprises, non-profit organisations, and cooperatives to render support as a contribution to the Government's MTSF (2019-2024). A needs assessment identified that the following skills were in demand: business plan development, financial management, project management and marketing. The Services SETA will work with SDPs to expand access to skills development.

Reimagined Industrial Strategy	This policy strongly supports spurring economic growth and development potential in both local and international markets (global value chains). Skill interventions required in support of the DTI's IPAP, SEZs and designated trades include those related to contact or call centres and business advising.
White Paper on Post- School Education and Training	The Services SETA has forged strategic partnerships with TVET Colleges, and Universities aimed at ensuring improved access to quality learning programmes increased relevance of skills development interventions and building strong partnerships between stakeholders and social partners.
Economic Reconstruction and Recovery Plan	The Services SETA has identified scarce, and critical skills prioritised by the Department for inclusion in this SSP update. These include Call or Contact Centre Manager; Quality Manager; Contact Centre Resource Planner; Contact Centre Forecast Analyst; Call or Contact Centre Manager; Inbound Contact Centre Consultant; Outbound Contact Centre Consultant; Contact Centre Real Time Advisor; Call or Contact Centre Agent. These lists of scarce and critical skills have been incorporated into the lists of hard to fill vacancies, skills gaps, and priority lists for implementation in the next financial year. Efforts are also underway to accommodate these lists in the 2023/24 financial year.
Youth Employment Initiative	The Presidential Youth Employment Initiative is South Africa's most comprehensive effort to address the crisis of youth who remain outside of employment, education and training. It is a campaign that calls upon all stakeholders to join forces to address youth unemployment. The Services SETA is committed to this initiative by providing Internship opportunities to TVET, CET and Universities graduates. Each year, the Services SETA set a target to contribute to the Presidential and DHET's target of placing these graduates.

2.4. Addressing National Priorities

Policies outlined above place a greater emphasis on the role of SMEs in propelling economic growth, livelihoods, and jobs. Whilst there are high rates and opportunities for entrepreneurial activity, entrepreneurship is both necessity- and opportunity-driven. Therefore, the needs differ across stages and the nature of the venture. This requires an applied, interactive, mentored and peer learning approach to grow their businesses. Against this background, the Services SETA is forging collaboration with other SETAs and key government departments. The strategy is being developed under our Strategic Partnership Department.

After the due diligence study conducted by the DHET on all SETAs finances following the call by the President to harness government efforts to mitigate the effects of COVID-19 global health pandemic to the economy. This triggered DHET to explore various means to contribute towards mitigating the effects of global pandemic. The outcome of this resulted in support of the proposed Presidential Youth Employment Intervention where learners will be undertaking the Work Integrated Learning targeting a total of 10 500 beneficiaries.

The Services SETA was proportionally allocated a total of 854 beneficiaries which amounted to R58 514 400,00 in 2022/2023 Annual Financial Year. In 2023/2024 and 2024/2025 financial years the SETA planned to replicate the programme for a total of 1 000 beneficiaries. The advantage of this programme is to ensure that the workplaces are Public TVET Colleges.

2.5. Conclusion

This chapter identified Information and Communication Technology, Climate Change, Economy and Globalisation as the key change drivers for the services sector. Implications for skills planning for each change driver were outlined. In addition, alignment to national priorities has been demonstrated, as well as specific interventions to address the priorities.

CHAPTER THREE: OCCUPATIONAL SHORTAGES AND SKILLS GAPS

3.1. Introduction

Chapter 1 defined the services sector and its scope of coverage, economic contributions and challenges posed by COVID-19, employer, and labour force profiles. Chapter 2 identified factors that are driving change in the services sector and influencing skills demand and supply of skills either positively or negatively, alignment to key government policies or programmes and interventions to address national priorities. This chapter focuses on occupational shortages, skills gaps, and occupational supply in the sector. Regarding occupational shortages and skills gaps, the chapter looks at what occupations are hard-to-fill, how many of these hard to fill occupations exist and why these occupations are hard-to-fill. In addition, major skills gaps that exist in the services sector are investigated, by occupational levels.

This is followed by an exploration of the extent and nature of skills supply. This covers the extent of occupational supply, the state of education and training provision and the supply problems that employers experience with the current labour market. The data was sourced from multiple sources such as the DHET's HEMIS/SETMIS data, Services SETA WSP data, Services SETA chamber-led research, desktop research and national accounts data.

The last section presents the Sectoral Priority Occupations and Interventions (SPOI) list of programmes that the Services SETA will implement to address both occupational shortages, skills gaps, and labour supply challenges. In drafting this chapter, the research methods employed was informed by a desktop literature review of employment and unemployment trends within the sector; an analysis of WSP/ATR data submitted by employers especially the vacancy trends and planned interventions, stakeholder consultation workshops and an online employer survey to corroborate findings across multiple sources.

3.2. Sectoral Occupational Demand

Occupational shortages occur when the demand for workers in specific occupations exceeds the supply of workers who are qualified, available, and willing to work – it refers – to excess demand for workers in specific occupations (DHET, 2020). The strongest indicator or unit to measure occupational shortages is the Hard-To-Fill Vacancies. A Hard-To-Fill Vacancy is a vacancy (occupation) that an employer was unable to fill within 12 months, or it took longer than 12 months for the employer to find a suitably qualified and experienced candidate.

On the other hand, skills gaps refer to skills deficiencies in employees or a lack of specific competencies by employees to undertake job tasks successfully based on required industry standards (DHET, 2020). The term "top-up skills" also refers to skills gaps. It usually requires a short training intervention. Skills gaps may arise due to lack of training, new job tasks, technological changes, or new production processes, to list a few, which need to be addressed.

3.2.1. Hard-To-Fill Vacancies

This section presents the list of hard-to-fill vacancies identified within the services sector. The list is informed by a desktop literature review of employment and unemployment trends within the sector; an analysis of WSP/ATR data submitted by employers, especially the vacancy trends and planned interventions, stakeholder consultation workshops and an online employer survey to corroborate findings across multiple sources. The list of hard-to-fill vacancies is presented per chamber along with the magnitude of demand. The lack of suitably qualified persons as cited as the main reason for delays in filling in vacations on time, along with equity considerations.

a) Cleaning and Hiring Services Chamber

The Cleaning and Hiring Services Chamber is one of the subsectors that in the main employ entry-level workers, except in management positions. It is, therefore, not surprising to note below in Table 14 that there is a high vacancy rate at the senior levels of employment, like manager and inspector or equivalent. Commonly cited reasons are the lack of suitably qualified people and relevant qualifications.

Table 14: Hard-to-Fill Vacancies, Cleaning and Hiring Services Chamber

OFO Code	Hard-To-Fill	No	Reasons	Occupational Qualifications to address
	Vacancy			the skills shortages
2021-143902	Cleaning Services Manager	133	Lack of relevant qualifications	Cleaning Operations Manager (FQ)Cleaning Contract Manager (PQ)
2021-515104	Cleaning Supervisor	218	Shortage of suitably qualified people	Cleaning Practitioner (FQ)
2021-811202	Healthcare Cleaner	2,197	Lack of relevant qualifications.Shortage of suitably qualified people	 Healthcare Cleaner (FQ) Crime scene cleaner / high risk cleaner (SP)
2021-811201	Commercial Cleaner	517	 Lack of relevant qualifications Shortage of suitably qualified people 	 Commercial Cleaner (FQ) Commercial Ablution Cleaner (PQ) Above Surface Cleaner (PQ) Kitchenette Cleaner (PQ) Commercial Floor Cleaner (PQ) High Pressure Water Jetting Cleaner (SP)
2021-812101	Laundry Worker	181	Lack of relevant qualifications	 Laundry Finisher (PQ) Laundry Sorter (PQ) Laundry Washer (PQ) Laundry Worker (FQ)
2021-821401	Garden Worker	81	Lack of relevant qualifications	Garden Worker (FQ)General Residential Repairer (Garden Maintenance) (SP)
2021-325705	Safety Inspector	179	Lack of relevant qualificationsShortage of suitably qualified people	■ Safety Inspector (SP)

The implication for skills development planning is the need to pay special attention to training at management and senior levels of employment. This observation speaks indirectly to transformational imperatives identified by the DHET (2014). Special attention should be paid to blacks, women, youth, and people with disability.

b) Communications and Marketing Services Chamber

The Communications and Marketing Services Chamber subsectors attract people with a relatively high level of skills and qualifications, see Table 15. The main reasons employers are struggling to fill vacant posts identified below for this Chamber are mostly the lack of relevant qualifications and lack of relevant skills are one of the top reasons why employers find it too long to fill vacancies below.

The list below also includes occupations identified by the Economic Reconstruction and Recovery Skills Strategy (ERRS) as critical for the success of the Economic Reconstruction and Recovery Plan (ERRP).

Table 15. Hard-to-Fill Vacancies, Communications and Marketing Services Chamber

lable 15. Hard-to-Fill Vacancies, Communications and Marketing Services Chamber				
OFO Code	Hard-To-Fill Vacancy	No	Reasons	Occupational Qualifications to address the skills shortages
2021-243201	Communication Coordinator	488	■ Lack of relevant skill	■ Communication Coordinator (PQ)
2021-143905	Call Centre Manager	124	Lack of relevant qualificationsLack of relevant skill	Contact Centre Manger (FQ)
2021-422206	Call or Contact Centre Agent	345	Lack of relevant qualificationsLack of relevant skill	Contact Centre Agent (FQ)
2021-333908	Marketing Coordinator	517	Lack of relevant qualificationsLack of relevant skill	■ Marketing Coordinator (FQ)
2021-122103	Director of Marketing	232	 Lack of relevant qualifications Shortage of suitably qualified people Lack of relevant skill 	Director of Marketing (FQ)
2021-122104	Interactive and Direct Marketing Strategist	691	 Lack of relevant qualifications Shortage of suitably qualified people Lack of relevant skill 	Interactive and DirectMarketing Strategist (SP)
2021-243103	Marketing Practitioner	109	■ Lack of relevant skill	 Marketing Practitioner (PQ)
2021-142104	Post Office Manager	178	■ Lack of relevant skill	Postal Frontline Service worker (FQ)

Implications for skills development is the need to pay special attention to transformational imperatives. A disproportional allocation of training budget and interventions should be made to blacks, women, youth, and people with disability. Most importantly, the Services SETA should ensure the availability of relevantly suitable qualifications to address the problem.

c) Labour and Collective Services Chamber

Due to the nature of its operations, the Labour and Collective Services Chamber seems to struggle to recruit staff in critical areas of recruitment. Table 16 illustrates that the main reasons for the inability to attract relevant staff include lack of relevant skills and the shortage of qualified people.

Table 16: Hard-to-Fill Vacancies, Labour and Collective Services Chamber

OFO Code	Hard-To-Fill Vacancy	No	Reasons	Occupational Qualifications to
				address the skills shortages
2021-242303	Human Resource Advisor	134	Lack of relevant qualificationsLack of relevant skill	 Human Resource Management and Practice Support (PQ) Human Resource Management (HRM) Administrator (PQ) Human Resource Management Officer (PQ) Human Resource Management Advisor (PQ)
2021-242304	Industrial Relations Advisor	638	Lack of relevant qualificationsLack of relevant skill	■ Industrial Relations Advisor (SP)
2021-261105	Conciliation /Arbitration Commissioner	116	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	Conciliation /Arbitration Commissioner (SP)
2021-242102	Transformation Manager	95	Lack of relevant qualifications	Transformation and Change Manager (PQ)
2021-226302	Health and Safety Officer		Lack of relevant qualificationsLack of relevant skill	 Health and Safety Officer
2021-335901	Labour Inspector	178	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	Labour Inspector (FQ)

The skills challenges related to the Labour and Collective Services Chamber imply that the Services SETA should sufficiently invest in Learnership and Internship interventions — with due consideration for transformation. These learning interventions provide prospective employees with sufficient and relevant exposure to the world of work, thereby preparing them for immediate absorption into the labour market.

d) Management and Business Services Chamber

Like other high-skills-based subsectors, the Management and Business Services Chamber, seems to be constrained by a lack of relevant skills and lack of relevant qualifications in attracting suitably qualified incumbents — see Table 17. Skills scarcity is also mainly concentrated in the management and senior occupational categories.

Table 17. Hard-to-Fill Vacancies, Management and Business Services Chamber

OFO Code	Hard-To-Fill Vacancy	No	Reasons	Occupational Qualifications to
				address the skills shortages
2021-121905	Project Manager	158	 Complexity - Lack of relevant skill Competence – Shortage of suitablyqualified people 	 Project Management for Non-project Managers (SP) Project Manager (FQ) Project Manager (Foundational Principles of PM vs LEAN) (SP)
2021-132107	Quality Manager	232	 Low supply – Shortage of qualifiedpersonnel Complexity - Lack of relevant skill 	 Quality Manager (FQ)
2021-252901	ICT Security Specialist	1834	Complexity - Lack of relevant skillLow supply - Shortage of qualifiedpersonnel	■ ICT Security Specialist (FQ)
2021-242101	Management consultant (Business Analyst, Business Consultant)	705	 Complexity - Lack of relevant skill Competence – Shortage of suitablyqualified people 	 Small Business Consultant (PQ) Management Assistant (SP) Management Consultant (Business Consultant) (FQ)
2021-122101	Business Development Manager	432	 Complexity - Lack of relevant skill Competence – Shortage of suitably qualified people 	Business Development Manager (FQ)
2021-121906	Franchise Manager	612	 Complexity - Lack of relevant skill Lack of relevant qualification Competence – Shortage of suitably qualified people 	■ Franchise Manager (FQ)
2021-121901	E-Commerce Manager (Entrepreneurial)	150	 Complexity - Lack of relevant skill Lack of relevant qualification Competence – Shortage of suitably qualified people 	 E-Commerce Manager (FQ) Corporate General Manager (Entrepreneurial E-Commerce Manager) (PQ)
2021-121901	Business Operations Manager	204	 Complexity - Lack of relevant skill Lack of relevant qualification Competence – Shortage of suitably qualified people 	Business OperationsManager (FQ)First Line Manager (PQ)
2021-333910	Business Support Coordinator	48	Lack of relevant qualification	Business Support Coordinator (PQ)
2021-684305	Quality Assurer	78	 Complexity - Lack of relevant skill Competence – Shortage of suitablyqualified people 	Quality Assurer (FQ)
2021-134903	Small Business Manager	194	 Complexity - Lack of relevant skill Lack of relevant qualification Competence – Shortage of suitably qualified people 	■ Coffee Bar Technician (FQ)

The current economic challenges of slow economic growth mean that skills related to turning around business operations, and consulting will be in higher demand. This is an ideal

opportunity for promoting transformation by aiming training interventions at marginalised groups as discussed above.

e) Personal Care Services Chamber

Personal Care Services Chamber is one of the subsectors that does not require a high level of qualifications to enter the labour market. Table 18 indicates that the nature of business is mostly informal and small in size. It is not surprising; therefore, the scarcity of skills is at the Clerical and Sales Workers, downwards.

The labour profile of this sector is that it is dominated by women and the majority are self-taught. These factors by themselves can be the greatest barrier to the growth and sustainability of entrepreneurs with a direct impact on the workforce.

Table 18. Hard-to-Fill Vacancies, Personal Care Services Chamber

OFO Code	Hard-To-Fill Vacancy	No	Reasons	Occupational Qualifications to address the skills shortages
2021-514101	Hairdresser	3890	Lack of relevant qualifications	 Hairdresser (FQ) Barber (SP) Chemical Hair Reformation Attendant (SP) Hair and Scalp Treatment Attendant (SP) Hair Coloring Attendant (SP) Hair Cutting Attendant (SP) Hairstylist (SP)
2021-514209	Aesthetic Laser Therapist	340	Lack of relevant qualificationsLack of relevant skill	Micro Needling (SP)
2021-514201	Beauty Therapist	400	Lack of relevant qualifications	Beauty Therapist (FQ)
2021-514207	Somatologist	243	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	■ Somatologist (FQ)
2021-514210	Image Consultant	204	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	■ Image Consultant (FQ)
2021-516301	Funeral Director	105	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	■ Funeral Director (FQ)
2021-516301	Mortician	640	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	Mortician (FQ)Mortician's Administrator (SP)
2021-641301	Stonemason	85	Lack of relevant qualificationsLack of relevant skill	 Stonemason (FQ) Stone Engraver (PQ) Stone Polisher (PQ) Erector (PQ)

2021-516303	Embalmer	118	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	Embalmer (FQ)Embalmer's Assistant (PQ)
2021-682201	Coffin Maker	213	Lack of relevant qualificationsLack of relevant skill	Coffin Maker (FQ)
2021-516306	Crematorium Operator	428	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	Crematorium Operator (FQ)

The implications for skills development planning for the subsector is the need to pay special attention to employees in precarious employment conditions; part-time employment and businesses vulnerable to closure. The aim should be to prepare vulnerable workers for alternative employment or to start their businesses. Women and youth fall under this category. New Venture Creation learning interventions are ideally suited for this subsector.

f) Real Estate and Related Services Chamber

The real estate subsector is one of the small, yet economically strong industries – in terms of GDP contribution and business revenue. At the same time, it is often slated for its slow pace of transformation. Skin colour remains the biggest impediment to entry for blacks. The industry is highly regulated, thereby requiring a fair level of literacy and educational qualifications. It is not surprising that vacancy rates are concentrated in the high-level occupational categories, and that underlying reasons include the lack of relevant skills, relevant qualifications and equity considerations, respectively, as illustrated in Table 19.

Table 19: Hard-to-Fill Vacancies, Real Estate and Related Services Chamber

OFO Code	Hard-To-Fill Vacancy	No	Reasons	Occupational Qualifications to address the skills shortages
2021-333901	Auctioneer	140	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	Auctioneer (FQ)
2021-333401	Property Manager	295	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill Equity Considerations 	Property Manager (Public Sector) (FQ)
2021-333405	Real Estate Principal Agent	334	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill Equity Considerations 	Real Estate Principal Agrt(PQ)Real Estate Agent (FQ)
2021-143901	Facility Manager	76	Lack of relevant qualificationsLack of relevant skillEquity Considerations	Facilities Manager (FQ)Facilities Manager (Entry level) (PQ)
2021-331501	Valuer	218	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill Equity Considerations 	■ Valuer (FQ)

2021-333907	Property Investor	135	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	Property Entrepreneur (PQ)
2021-121903	Managing Agent	86	 Shortage of suitably qualified people Lack of relevant qualifications Lack of relevant skill 	 Property Manager (managing Agent) (SP)
2021-333904	Property Business Broker	106	Lack of relevant qualificationsLack of relevant skill	Property Business Broker (SP)

For the real estate subsector, planning for skills development should consider training employees from historically disadvantaged backgrounds to address the transformation of the industry. Training interventions should be aimed at the upper echelons of occupational categories.

3.2.2. Additional List of Occupational Shortages

In addition to the above identified lists of hard-to-fill vacancies per chamber, the following occupations are considered to be in high demand in the services sector. Even though they are not identified as hard-to-fill, the Services SETA must keep a watchful eye on the ensure adequacy supplying by ensuring availability of relevant and appropriate occupational qualifications to address the demand.

Table 20: List of occupational in High Demand

OFO Code	Name of Occupation	Relevant Qualifications
2021-531103	Nanny	No qualification developed yet
2021-516401	Pet Groomer	 No qualification developed yet
2021-641902	Scaffolder	No qualification developed yet
2021-542903	Sales Clerk / Officer (Hire Coordinator)	No qualification developed yet
2021-422701	Survey Interviewer	Survey Interviewer
2021-343201	Interior Designer	 No qualification developed yet
2021-343202	Interior Decorator	No qualification developed yet
2021-251102	Data Scientist	■ Data Scientist
2021-216603	Multimedia Designer	Digital ManagerAdvanced Spatial Intelligence Data ScientistSpatial Intelligence
2021-251201	Software Developer	 Software Developer
2021-122105	Customer Service Manager	 No qualification developed yet
2021-121102	Payroll Manager	■ Payroll Manager
2021-431301	Payroll Administrator	 No qualification developed yet
2021-242302	Enterprise Resources Planner	 No qualification developed yet
2021-683104	Wig Maker	 No qualification developed yet
2021-514204	Nail Technologist/ Technician	 Qualification in development phase
2021-514204	Make-up Artist	 Qualification in development phase
2021-334101	Office Supervisor	 Office Supervisor
2021-334102	Office Administrator	No Qualification developed yet
2021-122201	Advertising/ Public Relations Manager	 Qualification in development phase

OFO Code	Name of Occupation	Relevant Qualifications
2021-243102	Market Research Analyst	■ Market Research Analyst
2021-122101	Sales and Marketing Manager	No qualification developed yet
2021-122102	Sales Manager	No qualification developed yet
2021-122105	Customer Service Manager	 No qualification developed yet
2021-121204	Recruitment Manager	Recruitment Manager
2021-333201	Events Manager (Conference and Event Organiser)	Conference and Events Organiser

3.2.3. Alignment of ERRSS Occupations

Analysis of the ERRSS reveals that the Services SETA is required to prioritise the following occupations.

Table 21: ERRSP Occupations falling under Services Sector

able 21. ENNSP Occupations familig under Services Sector				
Name of Occupation	Relevant Qualifications			
Call or Contact Centre Manager	NQF Level 6, 7 or 8			
Quality Manager	National Diploma in Engineering (Computer Systems), NQF Level 8; Bachelor of Technology in Quality Management, NQF Level 7; Master of Technology in Quality Management, NQF Level 9; National Diploma in Engineering (Computer Systems), NQF Level 8			
Contact Centre Resource Planner	National Diploma: Contact Centre Management, NQF 6			
Contact Centre Forecast Analyst	National Certificate: Contact Centre Operations, NQF 4			
Call or Contact Centre Manager	National Diploma: Contact Centre Management, NQF 6			
Inbound Contact Centre Consultant	National Certificate: Contact Centre Support NQF 2; National Certificate: Contact Centre and Business Process Support NQF 3			
Outbound Contact Centre Consultant	t Centre Consultant National Certificate: Contact Centre Support NQF 2; Nation Certificate: Contact Centre and Business Process Support NQF 3			
Contact Centre Real Time Advisor	National Diploma Contact Centre Management, NQF 5			
Call or Contact Centre Agent	Diploma Contact Centre Management, NQF Level 5			

Source: (DHET, 2022)

3.2.4. Skills Gaps

This section looks at the nature and extent of the demand for skills gaps within the services sector. It draws from literature reviews; employer surveys; WSP/ATR and Services SETA Performance Information data, and stakeholder consultation virtual workshops. There are two broad categories used, namely, soft and technical skills.

Soft skills are a combination of people skills, social skills, communication skills, character or personality traits, attitudes, career attributes, social intelligence, and emotional intelligence quotients, among others, that enable people to navigate their environment, work well with others, perform well, and achieve their goals with complementing hard skills.

On the other hand, technical skills may refer to the knowledge and expertise needed to accomplish complex actions, tasks and processes relating to computational and physical technology as well as a diverse group of other enterprises.

Table 22: Skills Gaps in the services sector

Major Group	Skills Gaps	Occupations
Managers	Quality management	Project Manager; Quality Manager
	Strategic management	Corporate Services Manager; Project
	Leadership	Manager; Payroll Manager; Business
	Financial Management	Manager; Franchise Manager
	Change management	
Professionals	Cybersecurity	Business Consultant
	Social media	Marketing Practitioner/ Coordinator
Clerical Support Workers	Customer service	Office clerk; Call Centre Agent
	Time management	
	Foreign language	
	Computer literacy	
	Work ethics	
Service and Sales Workers	Communications	Rental Salesperson; Hairdresser
Elementary Occupations	Communications	Cleaner; Event assistant
	Basic Computer	
	Customer Services	

Analysis of skills gaps requirements within the services sector, reveals a similar pattern. There is a strong demand for soft skills at the managerial level, whereas the requirement for technical skills is higher at the lower levels of occupational categories. Table 22 lists key skills gaps identified within the services sector by magnitude, major and occupational categories.

3.2.5. Alignment of ERRSS Skills Gaps

The following Skills gaps are addressed in the skills planning process of the Services SETA.

Table 23: ERRSS Skills Gaps

Skills gaps in need of current/short-term intervention (in the next 12 months)	Skills gaps in need of future/long-term intervention (over the next 5 years)	
Cloud architecture	Artificial Intelligence	
Cybersecurity	Biotechnology	
Data centre operations	Blockchain	
Desktop support engineering	Data analysis	
Enterprise architecture development	Data science	
Integrated systems development	Internet of Things	
Learning management systems architecture	Machine learning	
Network analysis, control, and security	Nanotechnology	
Software development engineering	Quantum computing	
Systems engineering	Robotic automation	

Source: (DHET, 2021)

3.3. **Extent and nature of supply**

3.3.1. The state of education and training provision

Higher Education and Training Programmes

Skills development ecosystem post-school education and training (PSET) consists of Technical, Vocational Education and Training (TVET), Community Education and Training (CET), private Colleges, public and private universities, and SETAs. PSET is positioned to ensure the pipeline of supply of skills for the labour market. There are 26 public universities, 132 private institutions of higher education, 50 TVET Colleges, 9 CETs, 257 registered private colleges and 21 SETAs. In addition, there are thousands of skills development providers. Altogether, the system enrolled more than 2,1 million learners in 2021 – see Figure 12.

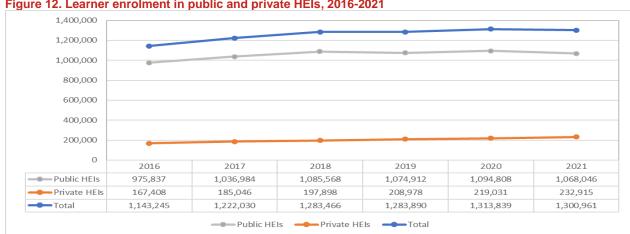

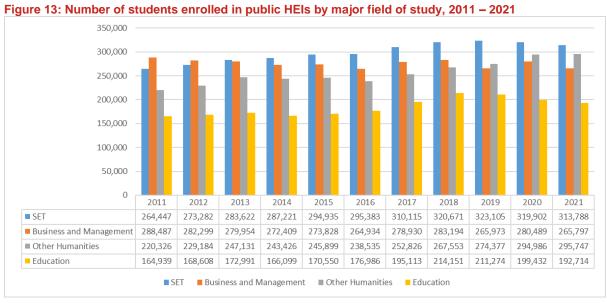

Figure 12. Learner enrolment in public and private HEIs, 2016-2021

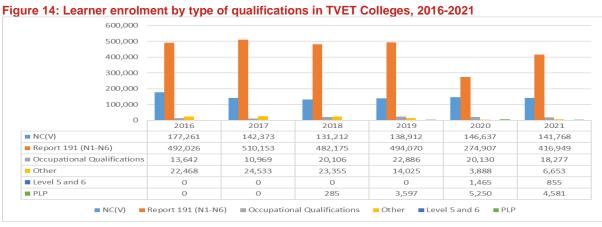

Source: (DHET, 2015; 16; 17; 19; 20; 21;22)

Within the public universities system, the highest intake is within the Science, Engineering and Technology (SET) followed by Humanities, Business and Management, and Education disciplines – see Figure 13. All fields of study experienced a decline in enrolment between 2020 and 2021, with the exception of other Humanities, which recorded a slight increase of 0.3% (761). The largest decline was in the Business and Management field of study, and enrolment decreased enrolment fell by 5.2% (14 692) between 2020 and 2021.

Source: (DHET, 2015; 16; 17; 19; 20; 21;22)

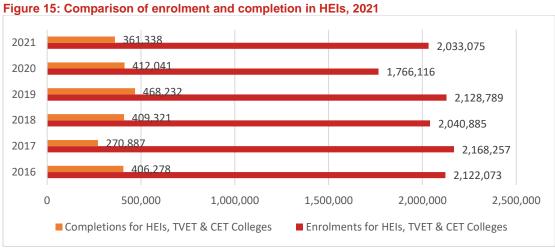

The noticeable decrease in enrolment implies that SETAs will need to strengthen the pipeline of skills supply for the services sector-related qualifications over the five years. The low rate of skills supply for the services sector is made pale by the low rate of enrolment of SETA-related qualifications in the TVET College space. For TVET colleges, Occupational qualifications are directly aligned to the SETA training facilitation mandate. As Figure 14 illustrates, enrolment in SETA-related qualifications has been the lowest among the rest. This state of affairs, once again, highlights the need for the Services SETA to work closely with TVET Colleges to strengthen the pipeline of skills supply.

Source: (DHET, 2015; 16; 17; 19; 20; 21;22)

A comparison of learner enrolments and completion figures in public and private universities, TVET and CET Colleges paints a bleak picture regarding the pipeline of skills supply. As Figure 15 illustrates, completion rates fall far short of enrolment rates. A detailed analysis of the data reveals a worrying trend of low completion rates within CET and TVET Colleges and public

universities. Together, these institutions account for more than 90% of the student enrolment in the country. Several trace studies reveal several underlying reasons which need to be addressed for the situation to be turned around. Key among them include access to learning materials and the quality of the school-leaving qualifications.

Source: (DHET, 2015; 16; 17; 19; 20; 21;22)

The next section explores the skills supply situation in the Sector Education and Training Authorities space. Like the HEIs, completion rates in the SETA space are worrying. The big challenge in the latter is insufficient workplaces that afford learners experiential learning opportunities. Unlike HEIs qualifications, occupational qualifications offered by SETAs include a workplace learning component.

Sector Education and Training Authorities

There are 21 SETAs responsible for different sectors as determined by DHET. There has been a steady increase in the enrolment of learners over the last five years. Enrolment in Learnerships has surpassed others, followed by Skills Programmes. Figure 16 illustrates this picture.

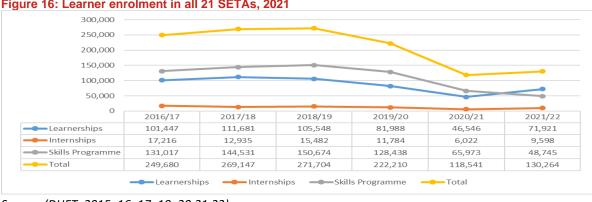

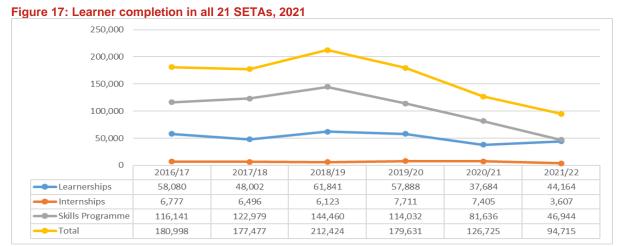

Figure 16: Learner enrolment in all 21 SETAs, 2021

Source: (DHET, 2015; 16; 17; 19; 20,21,22)

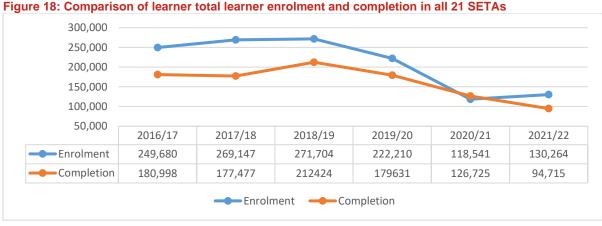

In line with the enrolment trend above, Skills Programmes registered the highest completion rates followed by Learnerships. Whilst also realising a steady increase in completion rates, Internship programmes' completion rates are far lower than the enrolments as Figure 17 illustrates. This is a problem common across all SETAs that needs closer scrutiny.

Source: (DHET, 2015; 16; 17; 19; 20; 21;22)

The discrepancy between enrolment and completion rates is aptly illustrated in FigureFigure 18: Comparison of learner total learner enrolment and completion in all 21 SETAs

18. The gap between the two is increasing instead of declining. What is even more worrying, is the fact that completion rates appear to decline more instead of increasing or remaining constant.

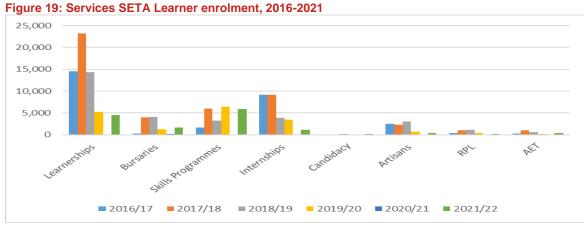

Source: (DHET, 2015; 16; 17; 19; 20,21,22)

The overall decline in completions within the PSET system places severe pressure on SETAs to enhance the pipeline of exiting the learners. The next section provides an overview of the Services SETA's contribution to the skills supply for the services sector.

Services SETA-funded learning interventions

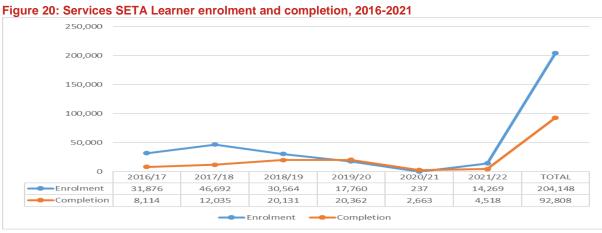

The Services SETA has made a noticeable contribution to skills development in the last five years. The highest rates of enrolment are in Learnership learning programme, followed by Internship. These two learning programmes are critical, because they mostly benefit youth and women. The latter category is, in most cases, new entrants to the labour market. These programmes equip them with relevant work experience and exposure to the world of work.

Source: (Services SETA LMIS, 2015; 16; 17; 18; 19,20,21,22)

Another critical area of improvement is Skills Programmes. As discussed above, this programme is ideally suited for already-employed learners who require top-up skills.

Regarding completion rates, the Services SETA, like other SETAs above, falls behind with completion – see Figure 20. Tracer studies revealed several reasons for this state of affairs. Key amongst them is the high rate of dropouts (Services SETA, 2022). Learners are often tempted to quit learning programmes when they find employment or receive enrolment acceptance from another SETA, TVET college or university.

Source: (Services SETA LMIS, 2015; 16; 17; 18; 19, 20, 21, 22)

The next section looks at the interventions developed by the Services SETA to improve the pipeline of skills supply for the sector.

3.3.2. Supply problems experienced by employers

Employers are more often equally concerned about the work-related practical skills or competencies that current or prospective employees can perform various job tasks successfully. The significance of investment in skills supply for the success of a business and its workforce is to ensure that the workforce is adequately trained to cope with the changing demands of their jobs.

Complex problem-solving skills are the most sought-after skills. Technical skills such as Information and Communication Technology literacy and active learning are also critical for optimum performance by employees, as do cognitive abilities and process skills (World Economic Forum, 2016). To adequately address skills gaps, a mixture of soft and technical skills is preferred. Training for critical skills usually takes the form of short courses delivered in-house or externally. Such programmes, due to their short duration, do not require accreditation and thus do not lead to national qualifications on the NQF.

Findings revealed that skills gaps that could emerge due to Covid-19 include behavioural change (e.g., social distancing), social media, and computer skills. As will be demonstrated below, the Services SETA is making a gradual significant investment in Skills Programmes. Investment in this area has grown fivefold in the last seven years. Training investment cuts across all occupational categories, with a substantial bias towards low-level occupations.

3.3.3. The extent of occupational supply

To respond to current skills demand within the services sector, about 70 occupational qualifications (i.e. Full/Part qualifications and Skills programmes) have been developed and registered with the QCTO. A majority of these occupational qualifications and skills programmes have been developed to address the occupational shortages within the sector Table 24 below.

Table 24: Registered Occupational Qualifications (Full/Part) and Skills Programmes

Cleaning & Hiring Services Chamber	Communication & Marketing Services	Management & Business Services
	Chamber	Chamber
Garden Worker (FQ)	Contact Centre Manger (FQ)	Project Manager (FQ)

3.4. Sectoral Priority Occupations and Interventions

This section presents the list of sectoral priority occupations and interventions – otherwise known as PIVOTAL – for the Services SETA for 2024/25. Identification of the list used primary and secondary research methods. Primary research involved a survey of employers falling under the Services SETA scope, employer interviews, consultations with key stakeholders through workshops, the Services SETA Management, and the Accounting Authority. The secondary research included analysis of WSP data, submitted by Services SETA employers as well as desktop literature reviews.

Literature Review and Performance Information

Analysis of sectoral priority occupations and interventions list for the services sector was preceded by a thorough literature review. A wide-ranging literature review was conducted to understand skills demand and supply in the services sector. Key documents included the World Economic Forums report on "the Future of Jobs" (2016) and the United Nations University WIDER Working Paper on "Understanding and characterising the services sector in South Africa" (2016).

Analysis of performance information constituted one component of the secondary data analysis. Performance information analysis included analysing enrolment data and WSPs. A descriptive evaluation research design was carried out to report on enrolled, planned or completed employer-funded and Services SETA-funded skills development interventions between 2016 and 2021. The analysis was based on key measures that focused on access and participation, learner completion, relevance, and skills supply. The WSP and ATR data submitted to the Services SETA by employers between 2022 and 2023 was also analysed to investigate areas of planned training, where training takes place and areas that need interventions through PIVOTAL programme.

Stakeholder Engagements

The Services SETA conducted virtual stakeholder engagements between 16 to 30 May 2023 to compile the draft list. The workshops aimed to validate the list of hard-to-fill vacancies and skills gaps as generated from the WSP/ATR and employer interviews. The sampling strategy used here was convenient sampling since the participation was limited only to the employers present at these workshops.

3.4.1. The main findings that informed the SPOI L list

Based on the discussions in Chapters 1, 2 and 3, consideration was given to: (i) Ensuring the pipeline of supply that there are sufficient and relevant qualifications on offer; (ii) That there are sufficient training providers, including assessors and moderators; and (iii) Adequate funding through Discretionary Funding is allocated to SPOI programmes through skills programmes, internships, learnerships and bursaries.

3.4.2. Envisaged outcomes from the identified interventions

The identified priority list aims to close the skills gaps within the services sector. Research reveals that there is a high vacancy rate in the sector, especially in middle and senior management.

3.4.3. Consultative processes

Consultations included interaction with stakeholders through workshops with middle and senior management of the Services SETA, and industry representatives as outlined in the methodology section.

3.4.4. Quantifying the SETA SPOI list

The Services SETA, in consultation with key stakeholders, estimated the quantity of the Priority Skills list as reflected in Table 24. The following methodology was followed:

- The top ten occupations were identified for each chamber, based on the average number of planned interventions captured in the WSP submissions to the Services SETA between 2021 and 2022 (excluding submissions where the chamber was listed as "Unknown");
- The average number of enterprises that submitted WSPs between 2022 and 2023 was determined for each chamber;
- The average number of planned interventions was divided by the average number of WSP submitters, to determine an average number of interventions per enterprise;
- The full population of both levy paying and non-levy paying enterprises operating in Services SETA-related sectors were identified per chamber;
- The projections are based on a linear forward projection of planned training interventions, based on the assumption that the average number of planned

interventions for the period 2012 to 2022 will also be applicable for future years. No other exogenous factors are considered for these projections.

3.4.5. Ranking of the Priority list

The ranking of the Priority list of the Services SETA is based on the priority of the Accounting Authority. The magnitude is based on the projection of demand as explained above. The magnitude of planned intervention is based on the available budget. An additional criterion was applied by the Accounting Authority to rank the priority list, namely: Employability (Job Creation), including upward mobility; skills transferability transformation and future skills. The priority list is provided in Table 26. The planned number of interventions was approved by the Accounting Authority after consultations with management and the industry.

Table 26: Services SETA Priority Occupations List 2024/25

SETA NAME	PERIOD	OCCUPATION CODE	OCCUPATION	SPECIALISATION/ ALTERNATIVE TITLE	INTERVENTION PLANNED BY THE SETA	NQF LEVEL	NQF ALIGNED	QUANTITY NEEDED	QUANTITY TO BE SUPPORTED

•	Mr. Menzi Fakude

3.5. Conclusion

This Chapter presented occupational shortages and skills gaps with reference to hard-to-fill vacancies as well as the extent and nature of supply. Reasons for hard-to-fill vacancies include lack of qualified people and lack of relevant experience, in the main. The analysis of the pipeline of supply of skills indicates incremental progress as there is a continuous growth in enrolments at learning institutions and Services SETA-funded learner numbers are progressively increasing each year. The Sectoral Priority Occupations and Interventions (SPOI) list indicates interventions that have been prioritised for implementation. Prioritisation of the list considered the priority areas of the ERRSS.

CHAPTER FOUR: SETA PARTNERSHIPS

4.1. Introduction

This chapter reports on existing and new partnerships between the Services SETA and key role players to effectively implement skills development interventions. A partnership is often defined as a collaborative agreement between two or more parties intended to achieve specified outcomes directed towards addressing mutually inclusive skills priorities or objective with a specified time frame.

The Services SETA has entered into partnerships with a number of post-education and training role players such as public, private and non-profit parties, including labour, to deliver skills development for the services sector. Progress on the existing partnerships will be provided. Furthermore, it describes the success factors, challenges experienced with existing partnerships, the planned partnerships as well as a SETA successful partnership model/approach. The partnership framework is informed by the NSDP's framework. The NSDP recognises that the skills development agenda requires collaborations among key role players in the ecosystem. Business and skills development providers — small and larger; private and public constitute the core of the ecosystem of the post-school education and training system. Figure 21 illustrates the NSDP partnership framework that has been adopted by the Services SETA.

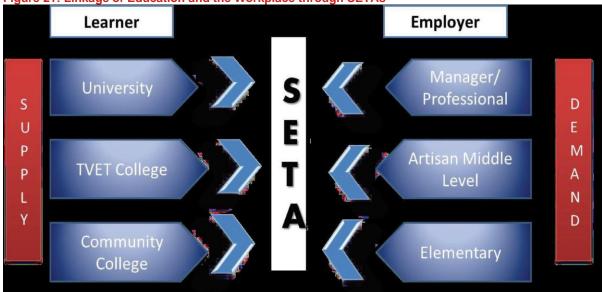

Figure 21: Linkage of Education and the Workplace through SETAs

Source: DHET (2009)

The framework acknowledges the importance of improving the relationship between education, training, and work. Workplace-based learning is central to achieving the policy objectives of the post-school education and training system. The role of SETAs as intermediary bodies is positioned as a key factor in linking the world of work and education.

4.2. An analysis of existing SETA partnerships

Table 27: List of existing partnerships with the Services SETA

Services SETA Sector Skills Plan 2024/25

4.3. Partnership performance analysis

4.2.1. TVET/CET Partnerships

The Infrastructure Development and Support partnerships a is working successfully. The aim is to ensure that in addition to providing infrastructure support to TVET colleges, attention is paid to equipping lecturers with the relevant skills and building capacities of council members to ensure effective governance. This partnership has implemented the training among TVET Lectures to expose to the industry and further provided bursary opportunities to lecturers. The research partnership is not working successfully as there's limited research capacity on the side of the TVET college which has delayed the implementation of research projects. There were also challenges with regard to tracing graduates to the lack of active/current contact details. The measures to strengthen this partnership is that we have incorporated capacity building as part of the partnerships and the TVET was advised to establish a research-focused unit in order to benefit fully from the partnership.

4.2.2. University Partnerships

This partnership is working successfully. Funding for tuition fees is one of the biggest obstacles to accessing university education by many students in the country. The missing class students are the hardest hit as their parents do not earn enough money to afford university tuition or qualify for a study loan. To close this gap, the Services SETA has partnered with USAF to provide bursary opportunities to university students and over 1000 students benefited from this funding. The project implementation was clear, and no delays were experienced from this project.

4.2.3. Government Departments Partnerships

There were challenges with this partnership. The main part of this partnerships is the construction of skills development centres which is for the benefit of local communities. However, the challenge in these partnerships is due to the changes in the scope of the construction project of which caused delays in completing the construction of the skills development centres. For this reason, the Services SETA has extended the contractual period and value. To strengthen this partnership the SETA has employed an experience construction personnel who is tasked to monitor and project manage all construction related projects.

4.4. Planned Partnerships

The SETA is looking into partnerships with the industry bodies with the aim of cultivating workplaces for our TVET/CET learners. We have seen how the TVET Colleges struggles to secure workplaces for their TVET learners who requires workplace exposure in order to complete their N6 diplomas. Partnerships with industry, TVET and SETA will yield good results of which will lessen the unemployment and dropout rate of TVET students. We are also looking into resuscitating the relationship with the Department of Small Business Development as most of our stakeholders are SMME and needs programmes aimed at business growth. With the move to occupational directed programmes the SETA will forger partnerships with TVET Colleges to build the capacity to deliver our programmes to industry.

4.5. Successful partnership approach/model

The Services SETA understands the value of effective partnerships and their role in assisting the SETA to achieve its strategic objectives. The partnership model is built around bringing all key role players in the services sector and in the skills planning ecosystems, such as government departments, industry bodies, and private sector businesses. Furthermore, The Services SETA has recently reviewed its current business operations through Business Optimization Process; it has found the importance of the following principles in implementing its partnerships and collaborations to ensure collective success:

- Careful planning
- Managing risk
- Clear strategy and goals
- Project management

All the above features were evident in the Services SETA's partnership with the Small Enterprise Development Agency (SEDA) making this a successful partnership as summarised below:

The Services SETA established a collaborative partnership with SEDA and the local municipalities in the rural areas to offer training on entrepreneurial skills and strengthen the entrepreneurial mindset and provide E-learning training to SMMEs and Co-operatives.

- ✓ This initiative involved joint research to identify the skills needs of the SMMEs sector and develop relevant training programmes targeted at Cooperatives, NPOs, Business start-ups and established businesses. This collaboration was based on *careful planning* and research that contributed to the successful implementation of the project.
- ✓ One of our Skills Development Providers rolled out the training programme using the E-learning platform. This required effective participation of SMEs in SETA learning interventions, especially those located in rural areas, often with limited internet access. This was achieved due to all parties' <u>clearly established strategies and goals</u> in the partnership. All partners understood their role in the SMMEs value chain and were able to link the relevant benefits for SMMEs, Co-operatives and gained the support of the local municipality.
- ✓ The project faced a risk of struggling with the internet to implement E-learning. <u>Effective risk management</u> was applied by, the Services SETA, using offices that are equipped to assist entrepreneurs with internet and computers.
- ✓ <u>Project management</u> contributed to the success of the project. The management of the partnership implemented key project management principles such as clear contractual objectives and TORs, regular communication and strict time and budget management in line with project deliverables.

In addition to the smooth management of the project in the end this e-learning training ensure that learners in rural areas gained access to helpful training on how to run the businesses.

4.6. Conclusion

This chapter highlighted best practices for the effective partnership for replication across the SETA landscape. Partnerships have great importance in the NSDP 2030. The SETA will continue to monitor and assess the implementation of these partnerships to improve their effectiveness.

CHAPTER FIVE: SETA MONITORING AND EVALUATION

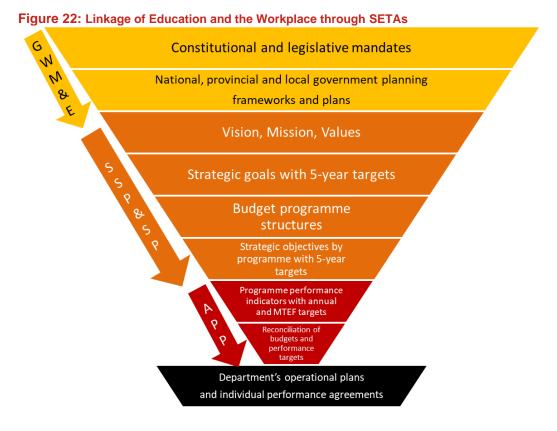

5.1. Introduction

This chapter addresses monitoring and evaluation practices at the Services SETA. It also addresses among other things, the approaches to M&E at the Services SETA, the use of performance information and audit outcomes to inform planning, and a review of the Services SETA's performance against the previous year's skills priorities. The latter will reflect on progress made, shortcomings and plans to address them.

5.2. Sector Skills Planning Reflections

5.2.1. The Services SETA's approach to Monitoring and Evaluation

The Services SETA's M&E approach is informed by the Policy Framework for the Government-wide Monitoring and Evaluation System (DPME, 2007). The GWM&E system recognises the role of evaluations, performance information, and social, economic, and demographic statistics in M&E function. The M&E approach of the Services SETA is further informed by the government approach to planning which places greater focus on outcomes and impact – results-based management framework embedded in the Theory of Change philosophy. The Theory of Change logical framework and alignment with Services SETA's strategic documents are highlighted in Figure 22. This planning philosophy and approach aims to help the organisation to focus on outcomes and impact as opposed to outputs (numbers) ensuring alignment with the mandate of the government of the day. Such an approach is critical for skills development interventions whose sole aim is to produce quality graduates that contribute to economic growth and social development.

51

This approach to performance monitoring and evaluation is further strengthened by the realisation that monitoring and evaluation happen at different levels and different intervals – e.g., organisational, department or programmatic level, and can happen monthly, quarterly or annually as demonstrated below.

Figure 23: Services SETA's M&E Framework

As the above framework illustrates, the Services SETA's M&E framework delineates between monitoring and evaluation activities. The monitoring function considers processes, compliance, financial, organisational performance and financial considerations. The reporting happens frequently and routinely to ensure efficiencies and improved performance. A dedicated unit – Performance Verification and Reporting is tasked with this responsibility.

Evaluation in its nature is a once-off activity that takes place mid- or end-term of the project/programme. The mid-term evaluation ensures that the intervention is on the right track to achieving the intended results, whereas the end-term evaluation is meant to investigate whether the intended outcomes or impacts have been realised. As a public entity, the Services SETA holds itself to ensuring value for money from its intervention. As a result, evaluation studies are conducted on strategic interventions to determine the value of money. A dedicated Unit – Impact Assessment – is tasked with this responsibility.

Outputs from both the monitoring and evaluation functions are feedback into the planning process to guide the strategic decision-making process. A skill planning unit – SSP & SP – is tasked with the responsibility of desalinating key pointers for decision-making and incorporating them in strategic documents such as the Sector Skills, Strategic, Annual Performance Plans, and ultimately, the Annual Report. The latter constitutes a public accountability mechanism.

5.2.2. Use of internal data to inform research and planning

The purpose of this section is to illustrate how the Services SETA uses information from the previous year's performance information annual reports and research reports, including tracer studies, and internal and external audits to inform research and planning.

The use of internal data for planning purposes is informed by the previous two figures which highlighted the approach to monitoring and evaluation, and the framework for its implementation. Internal data is used to monitor and evaluate progress against the turnaround strategy developed by the Accounting Authority and Management, "A Responsive Strategy". This strategy has identified six areas that needs urgent attention to turnaround the Services SETA and improve service deliver. These are outlined below:

Table 28. Use of internal data to inform research and planning

Focus Area	Description
Organisational Performance	Drive organisational performance to deliver effectively on NSDP2030 and mandate and ensuring responsiveness to sector skills needs as informed by ongoing labour market research, sector skills plan, strategic plan and annual performance plan.
Finance	Strive for effective and use of resources to ensure financial sustainability to meet the mandate through improvement of financial controls and effective implementation and monitoring of commitments.
Business Processes including systems	Improve and align business processes to ensure efficiencies in delivering the Services SETA strategic goals and Enhancements of ICT infrastructure and system, including integration of systems and platforms to optimise operational efficiencies.
People	Our people are central to the desired performance. The SETA aims to invest in capabilities of employees to drive a culture of continuous personal development and high performance.
Stakeholder Relationship	A healthy working relationship is critical to the success of the Services SETA. The Services SETA will continue to build, strengthen and maintain good relationship with its internal and external stakeholders.
Governance	Risk management and organisational compliance are critical governance function. The Services SETA strives to promote good governance by early detection of strategic risks and treatment thereof. Improved organisational compliance will ensure adherence to critical legislative prescripts.

This strategy is monitored on a monthly basis and progress update provided to the Accounting Authority quarterly. Research forms the basis of the Services SETA's plans. M&E research uses performance reports, and formative as well evaluation research to inform key strategic plans such as the Sector Skills Plan, Strategic Plan and Annual Performance Plan. M&E data is used to:

- Assess the effectiveness and relevance and impact of Services SETA's interventions in responding to transformational imperatives.
- Evaluate the implementation of learning programmes targeted at sector occupational shortages list.
- Analyse why intended results are not achieved; thus, gather lessons learnt; leading to recommendations for improvement.
- Provide data for policy development and qualification development.
- To provide data for planning and implementation of future projects.

• To provide reports used to assess the outcomes and impact of NSDS and the Services SETA's strategic objectives.

The Services SETA's Accounting Authority, and the subcommittees, exercises oversight, strategic guidance and organisational performance management using the following mechanisms:

- Quarterly monitoring reviews.
- Accounting Authority Strategy Session
- Governance & Strategy Committee oversight of research, planning and reporting documents.
- Review of annual performance, gaps, and reasons for either under or over achievement
- Updated research agenda and evaluation plan
- SSP development and update
- Strategic Plan and Annual Performance Plan Updated

Section 5.3. discusses measures that have been put in place to strengthen achievements and skills priorities. These measures are informed by the activities outlined above.

5.2.3. Prior year reflections

This section examines the extent to which priority actions identified in the prior year's SSP have been achieved. The SSP 2023/24 had identified four priority actions. Significant progress has been made concerning all priority actions. These action plans informed both the Strategic Plan and the Annual Performance for the 2023/24 financial year. Achievements are outlined below.

Table 29. Key Priority Actions – Prior Year Reflections

Key Prior Action	Progress Update
Foster Inter-SETA collaboration and industry partnership to promote SMME development in the services sector.	Collaboration with SETAs, Wits Business School and SEDA in the previous financial year highlighted to need to extend collaboration to support the development and growth of the SMEs sector. For this reason, the Services SETA will deepen this approach to include other SETAs that are currently not part of the collective.
Secure workplace training opportunities working in collaboration with the industry, employers, and the SETA.	The Services SETA has embarked on an extensive campaign of promoting the participation of large companies in funded and unfunded learning interventions and forging closer collaboration with these role players. This approach has netted some improvements.
Work with QCTO and industry role players to complete and implement registered occupationally directed qualifications.	The SETA managed to develop/re-align 10 occupational qualifications in the 2022/23 financial year. A targeted DG window for occupational qualification was opened in December 2022, this was a way of ensuring that the occupational qualifications are implemented for use by the industry. The allocations have not yet been concluded as there are no accredited SDPs in some qualifications.

	The SETA working together with the industry and the QCTO are developing assessment instruments and training tools. 35 occupational qualifications have been developed with 10 occupational skills programmes developed as well.
Strengthen alignment between industry needs and Services SETA supply through research, implementation, and structured M&E.	A preliminary organizational-wide M&E framework was developed and is ready for broad implementation. The following research topics were conducted as part of the Research Agenda addressing issues related to industry needs: 1. Skills Forecasting Model: A model of services SETA sectors is a model for the purposes of forecasting future skills needs. 2. The Employer Interview: A focused study reliant on industry participation collecting the latest skills needs from the industry. 3. Learner Tracer Study: A tracer study was conducted, delving into the impact of training on the industry and its alignment with industry needs.
Implementation of an organisational-wide M&E Framework to improve performance management	Services SETA has a Research and Impact Assessment Manager responsible for the M&E framework and its implementation. A preliminary organizational-wide M&E framework was developed and it will be ready for board implementation after extensive internal consultation

5.3. Measures to strengthen the achievement of skills priorities

The Services SETA has placed several measures in place to improve monitoring and evaluation function, and to strengthen achievements of skills priorities.

Planning Policy and Standard Operating Procedures: To streamline planning, monitoring and evaluation of approaches and practices.

Performance Information Management Standard Operating Procedures: To ensure reliable and comprehensive reporting of performance information, the Services SETA has developed an SOP to guide the collation, verification and reporting of performance information to internal and external stakeholders.

Qualifications Development and Maintenance Policy: Development of occupational qualifications is a regulated environment that requires stringent adherence to applicable legislation and policies. A policy on occupational qualifications development and maintenance has been developed to guide the Services SETA in this endeavour.

Organisational review: To promote organisational efficiency, the Services SETA has, under the direction of the Accounting Authority, embarked on a business process review which includes the review of the M&E function. The M&E function, broadly speaking, sits across various departments such as Planning, Special Projects, Quality Management Division and Learning Interventions and Projects Coordination. The aim is to integrate various existing monitoring, reporting and evaluation policies, processes, and systems under a single framework, that guides decision-making and ongoing planning.

Discretionary Grant Policy: The Services SETA is seized with the task of reviewing the DG policy to improve responsiveness to NSDP and ERRSS goals. The primary goal is to improve the mobilisation of the industry to participate in work-based learning programmes and to attract quality learners.

Work Integrated Learning: In the first place, the Services SETA has embarked on an ongoing engagement with CEOs of top levy-paying companies to strengthen relationships in order to secure work placements for learners. Secondly, the Services SETA has entered into a research partnership on WIL with TVET colleges to explore effective delivery models.

Inter-SETA collaboration: The Services SETA has prioritised collaboration with other SETAs to enhance the delivery of skills development interventions. This is particularly important considering skills needed by Services SETA levy-paying employers that require the use of qualifications across the SETA landscape. These may include finance, IT, and artisan-related qualifications by way of example.

5.4. Interventions implemented in support of the ERRP Skills Strategy

Both the Economic Recovery and Reconstruction Plan and the Skills Strategy were launched in the middle of the financial year, thereby allowing less time to fully incorporate them into the planned interventions and budget. Nevertheless, the Services SETA did endeavour to address related skills where possible. The ERRP considered the contact centre industry as one of the industries that can assist the reconstruction and recovery of South Africa's economy post-COVID-19. In turn, the ERRSS identified key occupations and qualifications required to support the growth of this sector.

In support of the ERRP, the Services SETA managed to provide 50 learnership opportunities to customer service managers. Current plans have made adequate provisions for ERRP Services SETA to support the reconstruction and recovery efforts by the country.

5.5. Conclusion

This chapter discussed the skills planning process at the Services SETA regarding institutional arrangements and staffing capacity. It demonstrated the strong alignment between planning and monitoring and evaluation at the Services SETA by ensuring that the functional departments work together and have the same reporting line. Secondly, the chapter reflected on progress against priority actions. All priority actions have been realised.

CHAPTER SIX: STRATEGIC SKILLS PRIORITY ACTIONS

6.1. Introduction

Chapter 6 highlights key discussion points from Chapters 1, 2, 3, 4 and 5. Drawing conclusions from those chapters, this chapter identifies possible areas of intervention and suggests actions that should be taken to address them. It also responds to measures that have been put in place to support national strategies and plans.

6.2. Findings from Previous Chapters

Chapter 1 highlighted the fact that the South African economy is struggling to grow at the required pace. The economy might be heading into a recession. Whilst some underlying causes are within the control of the South African government, others are not; like "international trade wars."

Despite these challenges, the services sector remains central to the South African economy. This sector continues to lead in terms of contribution to the Gross Domestic Product, at 22%, despite the decline in the overall growth rate. The sector creates employment opportunities for more than 3 million people: an equivalent of 28% of the national employment rate. A challenge facing the sector is the fact that it is shedding jobs at the lowest levels of the employment hierarchy, elementary and domestic workers. As pointed out above, this is the area where many employees in this sector are concentrated, more than 50%.

This state of affairs has serious implications for skills development; the need to up-skill lower-level workers to improve upward mobility and/or re-employment in other functional areas, such as IT, but most importantly, promoting entrepreneurial development. There is a need to prioritise training in the SMME space to support growth. Research reveals that medium enterprises are more likely to create new jobs than large ones. The establishment of the Strategic Partnership department by the Services SETA to support SMEs is a timely intervention in this regard.

Chapter 2 addresses key drivers for change in skills development and their impact. Information and Communication Technology; Climate Change, Globalisation and the Economy were identified as key change drivers in the services sector. The Fourth Industrial Revolution has a profound impact across sub-sectors and industries. Sub-sectors mostly impacted include marketing, contact centres, labour recruitment, business services and cleaning services. In addition, a longer-term view is required toward a just transition, recognising the impacts and social interventions needed to secure jobs as the economy shifts to sustainable production.

The skills development system needs to recognise the rapid pace of change and seek to be responsive and proactive. Displaced workers, those losing jobs through business closures, retrenchments and obsolete skills need to be a priority to seek to stem the further growth of unemployment, which has already reached critical levels. Implications for skills development are that the sector needs to respond appropriately and fast enough to ensure access to these developments. There is a need to constantly review current qualifications and the stage of

readiness of the training providers. The Services SETA is currently working with the industry to identify new qualifications that can best meet the sector demands. Chapter 2 further highlights the alignment between the Services SETA's skills development initiatives with key national policies such as the National Growth Plan, White Paper on Post-School Education and Training, NSDP, National Development Plan and ERRSS.

Chapter 3 discusses skills issues in the services sector. The chapter identifies vacancies for which it is difficult to recruit – hard-to-fill vacancies and skills gaps. Hard-to-fill vacancies refer to vacancies for which employers are unable to recruit or attract suitable talent for a period of more than 6 months. This serves as an indirect indicator of skills scarcity within the sector. The emergent list of hard-to-fill vacancies indicates that the sector is struggling to recruit for high-level skills (NQF Level 6 and above) such as managerial, professional, and technical occupational categories. Moreover, IT-related skills seem to be in higher demand. These are regarded as productive occupations of the sector that largely drive economic growth in the sector. Equally, skills gaps are concentrated in social skills such as solving complex problems, people management skills and cognitive skills.

The Occupational Priority (PIVOTAL) list of the Services SETA was developed using several data sources evaluated against the criteria of focusing on transformational and national imperatives, and labour and social demands. This exercise resulted in a list comprising a mixture of hard-to-fill vacancies and trades. Importantly, the PIVOTAL list was developed considering the need to balance supply across high, intermediary and entry-level qualifications.

The analysis of partnerships in Chapter 4 indicates the Services SETA's partnership model to promote access to skills development. A mixture of strategies has been devised and implemented to increase access to skills development. These involve partnerships with universities, colleges (TVET and Community), government departments, state-owned entities and collaboration with other SETAs.

Chapter 5 addresses monitoring and evaluation practices at the Services SETA. It emphasises the centrality of performance information and audit reports in informing the decision-making process in the organisation. Key sources of information are the ones derived from the pipeline analysis and risk analysis and review exercise. This chapter further reflected on the performance of the Services SETA against previous years' skills development priority actions. Four of the five action plans were achieved. Intervention measures have been put in place to realise the five-action plan.

6.3. Recommended Priority Actions

The SSP 2024/25 identified the below mentioned priorities. Since they are in the implementation stage, the management decided to retain to allow time for impact evaluation. However, their descriptions have been updated to reflect current developments.

Table 30. Recommended Priority Actions

Table 30. Recommended Priority Action	
Recommended Priority Actions	Explanation
Foster Inter-SETA collaboration and industry partnership to promote SMME development in the services sector	Collaboration with SETAs, Wits Business School and SEDA in the previous financial year highlighted to need to extend collaboration to support the development and growth of the SMEs sector. This goal is even more important in light current economic climate highlighted in Chapter 2. For this reason, the Services SETA will deepen this approach to include other SETAs that are currently not part of the collective.
Secure workplace training opportunities working in collaboration with the industry, employers, and the SETA	The Services SETA has embarked on an extensive campaign of promoting the participation of large companies in funded and unfunded learning interventions and forging closer collaboration with these role players. This approach has netted some improvements. The aim is to deepen this campaign in the 2024/25 financial year. This intervention will also in ensuring that the sector adapts well to the effects of globilisation and volatile economic environment including increasing costs of living due to climate change and energy costs.
Work with QCTO and industry role players to complete and implement registered occupationally directed qualifications	Closer collaboration between the Services SETA and QCTO has resulted in up to 10 qualifications being developed and/or update in one financial year to ensure the adequacy of supply for the services sector. Given the current backlog, this partnership will be strengthened this year to develop and/or align a further 10 qualifications.
Strengthen alignment between industry needs and Services SETA supply through research, implementation, and structured M&E	Rapid developments in the South African economy as brought about by ICT and COVID-19 require SETAs to conduct regular and relevant research to inform-decision making processes, but to also inform training interventions. The Services SETA will foster closer collaboration with industry partners, business, labour and university research institutions to conduct relevant and up-to-date research. Internal business operations will be streamlined to ensure efficient and effective implementation of learning interventions and timely monitoring and evaluation of impact. Services SETA impact is measured by the growth of the economic sector in terms of GDP and employment. Addressing key drivers of skills demand is critical in realising this goal.
Implementation of organisational-wide M&E Framework to improve performance management	In 2023/4, the Services SETA will be developing a framework that will draw from the GWM&E system and frameworks for Evaluation, Performance Standards (Monitoring), and Social, Economic and Demographic Statistics. The Theory of Change will be used to guide the M&E framework to adequately measure the impact of Services SETA's skills development interventions. This framework will be fully implemented in 2024/25 and form part of the internal review function.

6.4. The impact of the Fourth Industrial Revolution

The world of work beyond 2023 will be significantly different from the workplace of today. Therefore, the PSET system must appreciate these major shifts to cultivate a skills planning

system that will ensure programming that will endure the turbulence of the next five to 10 years. There is clear evidence that the technologies that underpin the Fourth Industrial Revolution are having a major impact on businesses and the world of work. Two priorities, for the Services SETA, are therefore to:

- Engender a deliberate programme aimed at stimulating sufficient understanding of disruptive changes eminent within the services sector;
- Resulting from the former, cultivate a workforce development strategy that is aligned to the unravelling innovation across the sector.

More specifically, to effectively engender a 4IR outlook on skills development the Service SETA will push for:

- Less onerous instruments for workforce training; which prepare individuals to move more easily across occupations rather than training them for specific occupations on the Organising Framework for Occupations (OFO).
- Reshaping of industry thinking away from a compliance approach towards SETA interventions while encouraging interventions that are premised on developing the specific skills workers require to apply unfamiliar disruptive technologies to innovative projects.
- Identifying, funding, and supporting priorities that equip individuals to create their own work, instead of preparing them for the job market.
- The Services SETA has designed and launched an online learning platform to facilitate the provision of skills development training interventions.
- The 4IR will also mitigate against the impact of COVID-19 on training interventions by ensuring the provisioning of training opportunities remotely to protect learners against possible exposure to the disease.

In line with the Institute for the Future thinking, the Services SETA will endeavour to incorporate a futuristic approach to qualifications development; an opportune time as the transition to occupational qualifications is being fast-tracked.

6.5. Measures to support national strategies and plans

This section discusses national strategies and plans to which Sector Skills Plan is aligned. It will also provide examples of interventions put in place to support this initiative.

Table 31. Alignment with National Strategies and Plans

National Strategies and Plans	Explanation
National Skills Development Plan,	The Services SETA has (i) established two university research chairs,
2030	namely M&E Research Chair (Rhodes University) and OFO Research
	Chair (REAL, WITS). It is supporting 16 Skills Development Centres
	across the country, with a special focus on rural areas. It has
	collaborated with Motheo TVET College and the Construction SETA
	to construct a National Artisan Academy in Mangaung. An
	Entrepreneurship and Cooperative Development Institute has been
	launched to support SEDA and SEFA in growing SMEs.

Reimagined Industrial Strategy	This policy strong support to spur economic growth and development potential in both local and international markets (global value chains). Re-industrialisation and localisation hold great potential if successfully achieved, currently, South Africa is faced with high unemployment rates and an enormous skills shortage which will obstruct the reindustrialisation drive before it starts. More than 6 million South Africans are unemployed, and youth unemployment remains stubbornly above 50% (Business Day, 2018). Skill interventions required in support of the DTI's IPAP, SEZs and designated trades include those related to contact or call centres and business advising.
Economic Reconstruction and Recovery Plan	The Economic Reconstruction and Recovery Plan aims to boost economic growth following the long spell of negative growth, exacerbated by COVID-19. The Plan identifies key sectors of the economy that require urgent attention. The services sector is one of the industries identified. The DHET's ERRSS identifies key occupations and skills gaps required to support the implementation of the ERRP. The Services SETA has identified these occupations and skills gaps for inclusion in the current SSP. To support this initiative, the Department of Higher Education, Science, and Innovation has developed a skills development strategy. The Services SETA has identified scarce, and critical skills prioritised by the Department for inclusion in this SSP update. These include Call or Contact Centre Manager; Quality Manager; Contact Centre Resource Planner; Contact Centre Forecast Analyst; Call or Contact Centre Manager; Inbound Contact Centre Consultant; Outbound Contact Centre Consultant; Contact Centre Real Time Advisor and Call or Contact Centre Agent. These lists of scarce and critical skills have been incorporated into the lists of hard to fill vacancies, skills gaps, and priority lists for implementation in the next financial year. Efforts are also underway to accommodate these lists in the 2023/24 financial year.
Presidential Youth Employment Initiative	As illustrated in Chapter 2, the Services SETA has aligned its internship programmes for CET, TVET and University graduates in support of the presidential initiative. Annual targets are set in consultation with DHET and monitored quarterly, bi-annually and annually.

6.6. Conclusion

This chapter provides a summary of chapters 1-5, with particular emphasis on implications for skills development, and interventions developed by the Services SETA to respond to these implications. Key priority actions to address skills demand and supply for the services sector have been outlined.
